CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). We have based these forward-looking statements on our current expectations and projections about future events. All statements, other than statements of present or historical fact included in this Quarterly Report, about our future financial performance, strategy, expansion plans, future operations, future operating results, estimated revenues, losses, projected costs, prospects, plans and objectives of management are forward-looking statements. Any statements that refer to projections, forecasts or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as “may,” “should,” “could,” “would,” “expect,” “plan,” “anticipate,” “intend,” “believe,” “estimate,” “continue,” “goal,” “project” or the negative of such terms or other similar expressions.

Forward-looking statements contained in this Quarterly Report on Form 10-Q include, but are not limited to, statements about:

- our business strategy and market opportunity;
- our future financial performance, including our expectations regarding our revenue, cost of revenue, gross profit, or gross margin, operating expenses (including changes in sales and marketing, research and development, and general and administrative expenses), and profitability;
- market acceptance of our games;
- our ability to raise financing in the future and the global credit and financial markets;
- factors relating to our business, operations, financial performance, and our subsidiaries, including:
 - changes in the competitive and regulated industries in which we operate, variations in operating performance across competitors, and changes in laws and regulations affecting our business;
 - our ability to implement business plans, forecasts, and other expectations, and identify and realize additional opportunities; and
 - the impact of the COVID-19 pandemic (including existing and possible future variants as well as vaccinations).
- our ability to maintain relationships with our platforms, such as the Apple App Store, Google Play Store, Amazon Appstore, and Facebook;
- the accounting for our outstanding warrants to purchase shares of Class A common stock;
- our ability to develop, maintain, and improve our internal control over financial reporting;
- our ability to maintain, protect, and enhance our intellectual property rights;
- our ability to successfully defend litigation brought against us;
- our ability to successfully close and integrate acquisitions to contribute to our growth objectives; and
- our success in retaining or recruiting, or changes required in, our officers, key employees or directors.

These forward-looking statements are based on our current plans, estimates and projections in light of information currently available to us, and are subject to known and unknown risks, uncertainties and assumptions about us, including those described under the heading “Risk Factors” in this Quarterly Report on Form 10-Q, and in other filings that we make with the Securities and Exchange Commission (the “SEC”) from time to time, that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. In addition, the risks described under the heading “Risk Factors” are not exhaustive. New risk factors emerge from time to time, and it is not possible to predict all such risk factors, nor can we assess the impact of all such risk factors on our business or the extent to which any risk factor or combination of risk factors may cause actual results to differ materially from those contained in any forward-looking statements. Forward-looking statements are also not guarantees of performance. You should not put undue reliance on any

forward-looking statements, which speak only as of the date hereof. Except as otherwise required by applicable law, we disclaim any duty to update any forward-looking statements, all of which are expressly qualified by the statements in this section, to reflect events or circumstances after the date of this Quarterly Report on Form 10-Q whether as a result of new information, future events or otherwise.

We intend to announce material information to the public through our Investor Relations website ir.playstudios.com, SEC filings, press releases, public conference calls and public webcasts. We use these channels, as well as social media, to communicate with our investors, customers, and the public about our company, our offerings, and other issues. It is possible that the information we post on our website or social media could be deemed to be material information. As such, we encourage investors, the media, and others to follow the channels listed above, including our website and the social media channels listed on our Investor Relations website, and to review the information disclosed through such channels. Any updates to the list of disclosure channels through which we will announce information will be posted on the investor relations page on our website.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited, in thousands, unless otherwise noted)

NOTE 1—BACKGROUND AND BASIS OF PRESENTATION***Organization and Description of Business***

On June 21, 2021 (the “Closing Date”), Acies Acquisition Corp., a Cayman Islands exempted company (prior to the Closing Date, “Acies”), consummated the previously announced business combination (“Business Combination”) with PlayStudios, Inc., a Delaware corporation (“Old PLAYSTUDIOS”) pursuant to the Agreement and Plan of Merger, dated as of February 1, 2021 (the “Merger Agreement”), by and among Acies, Catalyst Merger Sub I, Inc., a Delaware corporation and a direct wholly owned subsidiary of Acies (“First Merger Sub”), Catalyst Merger Sub II, LLC, a Delaware limited liability company and a direct wholly owned subsidiary of Acies (“Second Merger Sub”), and Old PLAYSTUDIOS. The Business Combination was accounted for as a reverse recapitalization and Acies was treated as the “acquired” company for accounting purposes. The Business Combination was accounted as the equivalent of Old PLAYSTUDIOS issuing stock for the net assets of Acies, accompanied by a recapitalization.

PLAYSTUDIOS, Inc., formerly known as Acies Acquisition Corp. (the “Company” or “PLAYSTUDIOS”), was incorporated on August 14, 2020 as a Cayman Islands exempted company, and domesticated into a Delaware corporation on June 21, 2021 (the “Domestication”). The Company’s legal name became PLAYSTUDIOS, Inc. following the closing of the Business Combination. The prior period financial information represents the financial results and conditions of Old PLAYSTUDIOS.

The Company develops and operates online and mobile social gaming applications (“games” or “game”) each of which incorporate a unique loyalty program offering “real world” rewards provided by a collection of rewards partners. The Company’s games are free-to-play and available via the Apple App Store, Google Play Store, Amazon Appstore, and Facebook (collectively, “platforms” or “platform operators”). The Company creates games based on its own original content as well as third-party licensed brands. The Company generates revenue through the in-game sale of virtual currency and through advertising.

Unless the context indicates otherwise, all references herein to “PLAYSTUDIOS,” the “Company,” “we,” “us,” and “our” are used to refer collectively to PLAYSTUDIOS, Inc. and its subsidiaries.

Basis of Presentation and Consolidation

The accompanying condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States of America (“US GAAP”) and pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). The consolidated financial statements include the accounts of PLAYSTUDIOS, Inc. and its consolidated subsidiaries. All intercompany balances and transactions have been eliminated upon consolidation. Certain reclassifications in these financial statements have been made to comply with US GAAP applicable to public companies and SEC Regulation S-X.

The significant accounting policies referenced in the annual consolidated financial statements of the Company as of December 31, 2021 have been applied consistently in these unaudited interim consolidated financial statements. In the opinion of the Company, the accompanying unaudited financial statements contain all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation of its financial position as of March 31, 2022, and its results of operations for the three months ended March 31, 2022, and 2021, and cash flows for the three months ended March 31, 2022, and 2021. The Consolidated Balance Sheet as of December 31, 2021 was derived from the audited annual financial statements but does not contain all of the footnote disclosures from the annual financial statements. The Company made certain reclassifications to the comparative balances in the condensed consolidated financial statements to conform with current year presentation.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with US GAAP requires us to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and notes thereto. Significant estimates and assumptions reflected in the Company’s condensed consolidated financial statements include the estimated consumption rate of virtual goods that is used in the determination of revenue recognition, useful lives of property and equipment and definite-lived intangible assets, the expensing and capitalization of research and development costs for internal-use software, assumptions used in accounting for income taxes, stock-based compensation and the evaluation of

goodwill and long-lived assets for impairment. The Company believes the accounting estimates are appropriate and reasonably determined. Due to the inherent uncertainties in making these estimates, actual amounts could differ materially.

Segments

Operating segments are defined as components of an entity for which discrete financial information is available, and that is regularly reviewed by the Chief Operating Decision Maker (“CODM”) in deciding how to allocate resources to an individual segment and in assessing performance. The CODM, the Company’s Chief Executive Officer, reviews financial information on a consolidated basis for purposes of evaluating performance and allocating resources. As such, the Company has one operating and reportable segment.

Emerging Growth Company

At March 31, 2022, the Company qualified as an “emerging growth company,” as defined in Section 2(a) of the Securities Act, as modified by the Jumpstart Our Business Startups Act of 2012 (the “JOBS Act”), and the Company has taken and may take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not emerging growth companies including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved.

Section 102(b)(1) of the JOBS Act exempts emerging growth companies from being required to comply with new or revised financial accounting standards until private companies are required to comply with the new or revised standards. The JOBS Act provides that an emerging growth company can elect to opt out of the extended transition period and comply with the requirements that apply to non-emerging growth companies but any such election to opt out is irrevocable. The Company has opted to take advantage of such extended transition period available to emerging growth companies which means that when a standard is issued or revised and it has different application dates for public or private companies, the Company can adopt the new or revised standard at the time private companies adopt the new or revised standard. The Company did not lose its emerging growth company status on December 31, 2021. As a result, the Company does not expect to adopt any accounting pronouncements currently deferred based on private company standards until a year subsequent to 2022. The Company will reevaluate its eligibility to retain emerging growth company status at the end of its second quarter of 2022, and otherwise as required.

NOTE 2—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

For a discussion of our significant accounting policies and estimates, please refer to our 2021 Annual Report on Form 10-K filed on March 3, 2022.

Share-Based Compensation

The Company has a stock-based compensation program which provides for equity awards including time-based stock options and restricted stock units (“RSUs”). Stock-based compensation expense is measured at the grant date, based on the estimated fair value of the award, and is recognized as expense over the requisite service period for the award. The Company records forfeitures as a reduction of stock-based compensation expense as those forfeitures occur.

The Company uses the Black-Scholes-Merton option-pricing model to determine the fair value for option awards. In valuing our option awards, the Company makes assumptions about risk-free interest rates, dividend yields, volatility and weighted-average expected lives. The Company accounts for forfeitures as they occur. Risk-free interest rates are derived from United States Treasury securities as of the option award grant date. Expected dividend yield is based on our historical cash dividend payments, which have been zero to date. The expected volatility for shares of the Company's Class A common stock is estimated using our historical volatility. The weighted-average expected life of the option awards is estimated based on our historical exercise data.

The Company's dual class structure was created upon the Domestication (as defined in Note 1—*Background and Basis of Presentation*). The Class B common stock including Class B common stock underlying vested stock options, held by Mr. Andrew Pascal, the Company's Chairman and Chief Executive Officer, or his affiliates (the “Founder Group”) carry a super vote premium. As the Founder Group did not have control of Old PLAYSTUDIOS prior to the Business Combination, and Mr. Pascal is an employee of the Company, the incremental value resulting from the super vote premium is accounted for as incremental compensation costs.

The Company utilized the market approach by observing other market participants with (i) dual class structures, (ii) super vote premiums for a single class and (iii) both classes trading on a national exchange. Based on the observed data, management selected a premium for the Class B common stock and the stock options held by members of the Founder Group.

The Company uses the estimated fair value of equity and associated per-share value at the time of grant to determine the compensation cost to be recognized associated with RSUs granted.

Recently Issued Accounting Pronouncements Not Yet Adopted

In February 2016, the Financial Accounting Standards Board ("FASB") issued ASU 2016-02, *Leases (Topic 842)*. The amended guidance is intended to increase transparency and comparability among organizations by recognizing lease assets and liabilities in the Consolidated Balance Sheets and disclosing key information about leasing arrangements. The adoption of this guidance is expected to result in a significant portion of the Company's operating leases, where the Company is the lessee, to be recognized in the Company's Consolidated Balance Sheets. The guidance requires lessees and lessors to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. This guidance is effective for the Company for fiscal years beginning after December 15, 2021, and interim periods within fiscal years beginning after December 15, 2022, with earlier adoption permitted. The Company intends to first present the application of this guidance in its Annual Report on Form 10-K for the year ending December 31, 2022 with an effective date of January 1, 2022. The Company is currently evaluating the impact of adopting this guidance.

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments - Credit Losses (Topic 326)*. The new guidance replaces the incurred loss impairment methodology in current guidance with a current expected credit loss model ("CECL") that incorporates a broader range of reasonable and supportable information including the forward-looking information. This guidance is effective for the Company for fiscal years beginning after December 15, 2022, including interim periods within that annual reporting period, with early adoption permitted. Application of the amendments is through a cumulative-effect adjustment to retained earnings as of the effective date. The Company is currently evaluating the impact of adopting this guidance.

Recently Adopted Accounting Pronouncements

In December 2019, the FASB issued ASU 2019-12, *Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes*. The new guidance removes certain exceptions for recognizing deferred taxes for investments, performing intraperiod allocation and calculating income taxes in interim periods. It also adds guidance to reduce complexity in certain areas, including recognizing deferred taxes for tax goodwill and allocating taxes to members of a consolidated group. The Company adopted this guidance prospectively on January 1, 2022. The adoption resulted in the Company not utilizing the prior exception under ASC 740-270-30-28 to the general methodology of calculating interim income taxes for the period ended March 31, 2022, but did not have a material impact on the Company's condensed consolidated financial statements.

NOTE 3—RELATED-PARTY TRANSACTIONS

The following table is a summary of balance sheet assets and liabilities from related parties:

	March 31, 2022	December 31, 2021	Financial Statement Line Item
Marketing Agreement	\$ 1,000	\$ 1,000	Intangibles, net

The Company did not have any revenues recognized from related parties during the three months ended March 31, 2022 and 2021.

The Company's expenses recognized from related parties were immaterial during the three months ended March 31, 2022 and 2021.

MGM Resorts International ("MGM")

MGM is a stockholder and MGM's Chief Commercial Officer also serves on the Company's Board of Directors. MGM owned approximately 16.6 million and 16.6 million shares of the Company's outstanding Class A common stock as of March 31, 2022 and December 31, 2021, respectively.

Marketing Agreement

In April 2011, the Company entered into a joint marketing agreement with MGM (as amended, the “Marketing Agreement”) in exchange for assistance with marketing campaigns and the exclusive right to utilize MGM’s licensed marks and licensed copyrights for the development of certain of the Company’s social casino games. The initial term was for one year from the go-live date of the first such game in July 2012, with an automatic renewal provision for successive two-year terms based on the games meeting certain performance criteria. If the games do not achieve the specified performance criteria, the term will be automatically renewed for a one-year period and the right to utilize MGM’s licensed marks and copyrights will become non-exclusive. The non-exclusive term will be automatically renewed for successive one-year periods so long as the games meet certain other performance criteria. As consideration for the use of MGM’s intellectual property, the Company issued 19.2 million shares of its common stock representing 10% of its then-outstanding common stock; and in lieu of royalty payments, the Company agreed to pay MGM a profit share of: (i) during the exclusive term, a mid- to high-single digit percentage of cumulative net operating income, as defined in the Marketing Agreement, and (ii) during the non-exclusive term, a low- to mid-single digit percentage of cumulative net operating income. As further described in Note 8—*Goodwill and Intangible Assets*, the Marketing Agreement was recorded as an indefinite-lived intangible asset.

On October 30, 2020, the Company and MGM agreed to amend the Marketing Agreement (the “MGM Amendment”), under which the Company and MGM agreed to terminate the profit share provision. In exchange, the Company agreed to remit to MGM a one-time payment of \$20.0 million, payable on the earliest to occur of (i) the PIPE Investment, (ii) the date that the Company waives MGM’s commitment to participate in the PIPE Investment, or (iii) two years from the date of the MGM Amendment. In addition, MGM agreed to reinvest in the Company at a minimum amount of \$20.0 million by participating in the PIPE Investment or a private placement of equity offering to third party investors for minimum gross proceeds to the Company of \$50.0 million. As a result of the termination, the Company is no longer obligated to make profit share payments, but the other rights and obligations under the Marketing Agreement continue in full force and effect.

On June 21, 2021, the Company consummated the Business Combination and MGM participated in the PIPE Investment. In connection with the PIPE Investment, the Company recorded an equity contribution from MGM as a settlement of the \$20.0 million liability. As of March 31, 2022, the \$20.0 million liability was settled in full and no amount remained outstanding.

NOTE 4—RECEIVABLES

Receivables consist of the following:

	March 31, 2022	December 31, 2021
Trade receivables	\$ 20,731	\$ 20,540
Other receivables	251	153
Total receivables	<u>\$ 20,982</u>	<u>\$ 20,693</u>

Trade receivables generally represent amounts due to the Company from social and mobile platform operators, including Apple, Google, Amazon and Facebook. Trade receivables are recorded when the right to consideration becomes unconditional. No allowance for doubtful accounts was considered necessary as of March 31, 2022 and December 31, 2021.

Concentration of Credit Risk

As of March 31, 2022, Apple, Inc. and Google, Inc. accounted for 41.3% and 33.0% of the Company’s total receivables, respectively, while as of December 31, 2021, Apple, Inc. and Google, Inc. accounted for 43.0% and 34.6% of the Company’s total receivables, respectively. As of March 31, 2022 and December 31, 2021, the Company did not have any additional counterparties that exceeded 10% of the Company’s net accounts receivable.

During the year ended December 31, 2021, the Company entered into agreements pursuant to which the Company acquired the rights to develop and operate Tetris®-branded mobile games. As contemplated in the agreements, the Company agreed to an \$8.0 million Advance Payment (as defined in Note 14—*Commitments and Contingencies*). If the Company and the counterparty fail to perform according to the terms of the agreements, the maximum amount of loss which the Company may incur is approximately \$9.3 million, of which \$8.0 million related to the Advance Payment is reported within the Other long-term assets line item on the Consolidated Balance Sheets.

NOTE 5—FAIR VALUE MEASUREMENT

The carrying values of the Company's cash and cash equivalents, trade receivables and accounts payable approximate fair value due to their short maturities.

The following tables present the financial assets not measured at fair value on a recurring basis as of March 31, 2022 and December 31, 2021:

	March 31, 2022			Financial Statement Line Item
	Carrying Value	Estimated Fair Value	Fair Value Hierarchy	
Financial assets:				
Notes receivable - current	\$ 72	\$ 72	Level 3	Receivables
Notes receivable - non-current	1,250	1,250	Level 3	Other long-term assets
Prepaid expenses - non-current	8,000	8,000	Level 3	Other long-term assets
Total financial assets	<u>\$ 9,322</u>	<u>\$ 9,322</u>		

	December 31, 2021			Financial Statement Line Item
	Carrying Value	Estimated Fair Value	Fair Value Hierarchy	
Financial assets:				
Notes receivable - current	\$ 8	\$ 8	Level 3	Receivables
Notes receivable - non-current	\$ 3,391	\$ 3,391	Level 3	Other long-term assets
Prepaid expenses - non-current	\$ 8,000	\$ 8,000	Level 3	Other long-term assets
Total financial assets	<u>\$ 11,399</u>	<u>\$ 11,399</u>		

The notes receivable are fixed-rate investments, are not traded and do not have observable market inputs, therefore, the fair value is estimated to be equal to the carrying value. The advance payment is not a traded asset and does not have observable market inputs, therefore, the fair value is estimated to be equal to the carrying value.

The following tables present the liabilities measured at fair value on a recurring basis, by input level, in the Consolidated Balance Sheets at March 31, 2022 and December 31, 2021:

	March 31, 2022			
	Level 1	Level 2	Level 3	Total
Financial liabilities:				
Public Warrants	\$ 6,027	—	—	6,027
Private Warrants	—	3,210	—	3,210
Total financial liabilities	<u>\$ 6,027</u>	<u>\$ 3,210</u>	<u>\$ —</u>	<u>\$ 9,237</u>

	December 31, 2021			
	Level 1	Level 2	Level 3	Total
Financial liabilities:				
Public Warrants	\$ 4,255	—	—	4,255
Private Warrants	—	2,266	—	2,266
Total financial liabilities	<u>\$ 4,255</u>	<u>\$ 2,266</u>	<u>\$ —</u>	<u>\$ 6,521</u>

NOTE 6—PROPERTY AND EQUIPMENT, NET

Property and equipment, net consists of the following:

	March 31, 2022	December 31, 2021
Computer equipment	\$ 8,943	8,819
Leasehold improvements	6,496	6,310
Purchased software	2,352	542
Furniture and fixtures	\$ 2,300	\$ 2,125
Construction in progress	911	721
Total property and equipment	21,002	18,517
Less: accumulated depreciation	(13,887)	(13,228)
Total property and equipment, net	\$ 7,115	\$ 5,289

The aggregate depreciation expense for property and equipment, net is reflected in "Depreciation and amortization" in the Consolidated Statements of Operations. During the three months ended March 31, 2022 and 2021, depreciation expense was \$0.8 million and \$0.7 million, respectively. No impairment charges or material write-offs were recorded for the three months ended March 31, 2022 and 2021.

Property and equipment, net by region consists of the following:

	March 31, 2022	December 31, 2021
United States	\$ 3,281	\$ 1,672
EMEA ⁽¹⁾	2,916	2,813
All other countries	918	804
Total property and equipment, net	\$ 7,115	\$ 5,289

(1) Europe, Middle East, and Africa ("EMEA"). Amounts primarily represent leasehold improvements of local office space and computer equipment.

NOTE 7—INTERNAL-USE SOFTWARE, NET

Internal-use software, net consists of the following:

	March 31, 2022	December 31, 2021
Internal-use software	\$ 128,487	\$ 130,942
Less: accumulated amortization	(92,865)	(87,675)
Total internal-use software, net	\$ 35,622	\$ 43,267

The aggregate amortization expense for internal-use software, net is reflected in "Depreciation and amortization" in the Consolidated Statements of Operations. During the three months ended March 31, 2022 and 2021, the Company capitalized internal-use software development costs of \$6.6 million and \$6.9 million. Total amortization expense associated with its capitalized internal-use software development costs for the three months ended March 31, 2022 and 2021 was \$5.9 million and \$5.2 million.

During the three months ended March 31, 2022, the Company adopted a plan to suspend the further development of Kingdom Boss, resulting in a change in the useful life of the assets associated with Kingdom Boss. The Company recorded a \$8.4 million non-cash impairment charge during the first quarter of 2022 within "Restructuring and related" in the Consolidated Statement of Operations. There were no write-offs or impairment charges recorded for the three months ended March 31, 2021.

NOTE 8—GOODWILL AND INTANGIBLE ASSETS**Goodwill**

The Company had \$5.1 million in goodwill as of March 31, 2022 and December 31, 2021. There were no business combinations during the three months ended March 31, 2022 and 2021. There were no indicators of impairment as of March 31, 2022 and December 31, 2021.

Intangible Assets

The following table provides the gross carrying value and accumulated amortization for each major class of intangible asset other than goodwill:

	March 31, 2022			December 31, 2021		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Amortizable intangible assets:						
Licenses	\$ 19,000	\$ (2,932)	\$ 16,068	\$ 19,000	\$ (1,245)	\$ 17,755
Trade names	1,240	(1,240)	—	1,240	(1,240)	—
	20,240	(4,172)	16,068	20,240	(2,485)	17,755
Nonamortizable intangible assets:						
Marketing Agreement with a related party	1,000	—	1,000	1,000	—	1,000
Total intangible assets	\$ 21,240	\$ (4,172)	\$ 17,068	\$ 21,240	\$ (2,485)	\$ 18,755

Intangible assets consist of trade names and long-term license agreements with various third parties. In 2021, the Company entered into agreements with N3TWORK Inc. and The Tetris Company, LLC pursuant to which the Company acquired the rights to develop and operate Tetris®-branded mobile games for an initial term through August 2024. The Company paid N3TWORK Inc. \$13.0 million at closing and agreed to pay up to an additional \$34.0 million subject to satisfaction of certain conditions, of which \$8.0 million was an Advance Payment (as defined in Note 14—*Commitments and Contingencies*). In addition, the Company will pay royalties to The Tetris Company, LLC, the licensor of the rights.

The aggregate amortization expense for amortizable intangible assets is reflected in “Depreciation and amortization” in the Consolidated Statements of Operations. During the three months ended March 31, 2022 and 2021, amortization was \$1.7 million and \$0.1 million, respectively. There were no impairment charges for intangible assets for the three months ended March 31, 2022 and 2021.

As of March 31, 2022, the estimated annual amortization expense for the years ending December 31, 2022 through 2026 is as follows:

Year Ending December 31,	Projected Amortization Expense
Remaining 2022	\$ 5,059
2023	6,645
2024	4,364
2025	—
2026	—
Total	<u>\$ 16,068</u>

NOTE 9—WARRANT LIABILITIES**Public Warrants and Private Warrants**

Upon the closing of the Business Combination, there were approximately 7.2 million publicly-traded redeemable warrants to purchase shares of Class A common stock (the "Public Warrants") and 3.8 million redeemable warrants to purchase shares of Class A common stock initially issued to the Sponsor in a private placement (the "Private Warrants") were issued by Acies prior to the Business Combination. Each whole Public Warrant entitles the registered holder to purchase one whole share of the Company's Class A common stock at a price of \$11.50 in cash per share, subject to adjustment as discussed below, as of October 27, 2021. Pursuant to the Warrant Agreement, a holder of Public Warrants may exercise the Public Warrants only for a whole number of shares of Class A common stock. The Public Warrants will expire 5 years after the completion of the Business Combination, or earlier upon redemption or liquidation. The Private Warrants are identical to the Public Warrants, except that the Private Warrants and the shares of Class A common stock issuable upon exercise of the Private Warrants were not transferable until after the completion of the Business Combination, subject to certain limited exceptions. Additionally, the Private Warrants are non-redeemable so long as they are held by the initial holder or any of its permitted transferees. If the Private Warrants are held by someone other than the initial holder or its permitted transferees, the Private Warrants will be redeemable by the Company and exercisable by such holders on the same basis as the Public Warrants. The Private Warrants may be exercised on a cashless basis so long as held by the Sponsor or certain permitted transferees.

The Company may redeem the outstanding Public Warrants in whole, but not in part, at a price of \$0.01 per Public Warrant upon a minimum of 30 days' prior written notice of redemption, if and only if the last sale price of the Company's common stock equals or exceeds \$18.00 per share for any 20-trading days within a 30-trading day period ending three business days before the Company sends the notice of redemption to the Warrant Holders. If the Company calls the Public Warrants for redemption, management will have the option to require all holders that wish to exercise the Public Warrants to do so on a cashless basis. In no event will the Company be required to net cash settle the exercise of Public Warrants.

At March 31, 2022, there were approximately 7.2 million Public Warrants and 3.8 million Private Warrants outstanding. Refer to Note 5—*Fair Value Measurements* for further information.

On April 1, 2022, the Company commenced (i) an offer to each holder of its outstanding Public Warrants and Private Warrants (collectively, the "Warrants"), each to purchase shares of its Class A common stock, par value \$0.0001 per share, the opportunity to receive \$1.00 in cash, without interest, for each outstanding Warrant tendered by the holder pursuant to the offer (the "Offer to Purchase"), and (ii) the solicitation of consents (the "Consent Solicitation") from holders of the outstanding Warrants to amend the Warrant Agreement, dated as of October 22, 2020, by and between the Company (formerly Acies Acquisition Corp.) and Continental Stock Transfer & Trust Company, which governs all of the Warrants (the "Warrant Amendment") (collectively the "Tender Offer"). If approved, the Warrant Amendment would permit the Company to redeem each outstanding Warrant for \$0.90 in cash, without interest, which is 10% less than the purchase price applicable to the Offer to Purchase. The total amount of cash required to complete the Offer to Purchase, including the payment of any fees, expenses and other related amounts incurred in connection with the Offer to Purchase, will be approximately \$11.9 million, all of which the Company will fund from its existing and available cash reserve, with no alternative plans to finance the purchase of the tendered Warrants.

NOTE 10—ACCRUED LIABILITIES

Accrued liabilities consist of the following:

	March 31, 2022	December 31, 2021
Accrued payroll and vacation	5,626	5,696
Minimum guarantee liability	5,200	5,200
Other accruals	5,943	4,703
Total accrued liabilities	\$ 16,769	\$ 15,599

NOTE 11—REVENUE FROM CONTRACTS WITH CUSTOMERS**Disaggregation of Revenue**

The following table summarizes the Company's revenue disaggregated by type, and by over time or point in time recognition:

	Three Months Ended March 31,	
	2022	2021
Virtual currency (over time) ⁽¹⁾	\$ 65,935	\$ 73,226
Advertising (point in time)	4,075	871
Other revenue (point in time)	441	—
Total net revenue	<u>\$ 70,451</u>	<u>\$ 74,097</u>

(1) Virtual currency is recognized over the estimated consumption period.

The following table summarizes the Company's revenue disaggregated by geography:

	Three Months Ended March 31,	
	2022	2021
United States	\$ 62,103	\$ 64,074
All other countries	8,348	10,023
Total net revenue	<u>\$ 70,451</u>	<u>\$ 74,097</u>

Contract Balances

Contract assets represent the Company's ability to bill customers for performance obligations completed under a contract. As of March 31, 2022 and December 31, 2021, there were no contract assets recorded in the Company's consolidated balance sheet. The deferred revenue balance related to the purchase of virtual currency was immaterial as of March 31, 2022 and December 31, 2021. The opening and closing balance of trade receivables is further described in Note 4—*Receivables*.

NOTE 12—LONG-TERM DEBT**Credit Agreement**

On June 24, 2021, in connection with the Closing, the Company terminated and replaced the Revolver (as defined below). The Company, a subsidiary of the Company, JPMorgan Chase Bank, N.A., as administrative agent and JPMorgan Chase Bank, N.A., Silicon Valley Bank and Wells Fargo Securities, LLC, as joint bookrunners and joint lead arrangers entered into a credit agreement (the "Credit Agreement") which provides for a five-year revolving credit facility in an aggregate principal amount of \$75.0 million. Borrowings under the Credit Agreement may be borrowed, repaid and re-borrowed by the Company, and are available for working capital, general corporate purposes and permitted acquisitions.

Commitment fees and interest rates are determined on the basis of either a Eurodollar rate or an Alternate Base Rate plus an applicable margin. The applicable margins are initially 2.50%, in the case of Eurodollar loans, and 1.50%, in the case of Alternate Base Rate loans. The applicable margin is subject to adjustment based upon the Company's Total Net Leverage Ratio (as defined in the Credit Agreement). Eurodollar rates and the Alternate Base Rate are subject to floors of 0.00% and 1.00%, respectively. The Credit Agreement contains various affirmative and negative financial and operational covenants applicable to the Company and its subsidiaries.

The Credit Agreement includes customary reporting requirements, conditions precedent to borrowing and affirmative, negative and financial covenants. Specific financial covenants include the following, commencing with the quarter ended September 30, 2021:

- Maximum Net Leverage Ratio of 3.50:1.00 (subject to increase to 4.00:1.00 following consummation of certain material acquisitions)
- Minimum Fixed Charge Coverage Ratio of 1.25:1.00.

At issuance, the Company capitalized \$0.7 million in debt issuance costs. As of March 31, 2022, the Company has not made any drawdowns on the Credit Agreement.

Private Venture Growth Capital Loans

On March 27, 2020, the Company entered into an agreement for a revolving credit facility (the “Revolver”) with Silicon Valley Bank. The Revolver was secured by the assets including intellectual property of the Company and matures on September 27, 2022. Borrowings under the Revolver may be borrowed, repaid and re-borrowed by the Company, and are available for working capital, general corporate purposes and permitted acquisitions. Up to \$3.0 million of the Revolver may be used for letters of credit. On June 24, 2021, in connection with the Closing, the Company terminated and replaced the Revolver as described above.

NOTE 13—INCOME TAXES

The Company recorded an income tax expense of \$7.8 million and \$1.3 million for the three months ended March 31, 2022 and 2021, respectively. Our effective tax rate was (45.1)% for the three months ended March 31, 2022 compared to 18.5% for the three months ended March 31, 2021. The effective rate of (45.1)% differs from the federal statutory rate of 21% primarily due to the jurisdictional mix of earnings at differing tax rates, research and development tax credits, non-deductible stock compensation, and the effect of a valuation allowance on certain federal deferred tax assets.

NOTE 14—COMMITMENTS AND CONTINGENCIES

Minimum Guarantee Liability

The following are the Company’s total minimum guaranteed obligations as of:

	March 31, 2022	December 31, 2021
Minimum guarantee liability - current	5,200	5,200
Total minimum guarantee obligations	\$ 5,200	\$ 5,200
Weighted-average remaining contractual term (in years)	2.4	2.6

The following are the Company’s remaining expected future payments of minimum guarantee obligations as of March 31, 2022:

Year Ending December 31,	Minimum Guarantee Obligations
Remainder of 2022	\$ 5,200
2023	—
2024	—
2025	—
2026	—
Total	\$ 5,200

Leases

The Company leases both office space and office equipment and classifies these leases as either operating or capital leases for accounting purposes based upon the terms and conditions of the individual lease agreements. As of March 31, 2022, all leases were classified as operating leases and expire at various dates through 2027, with certain leases containing renewal option periods of two to five years at the end of the current lease terms.

The Company's future minimum rental commitments as of March 31, 2022, are as follows:

Year Ending December 31,	Minimum Rental Commitments
Remaining 2022	\$ 3,042
2023	4,415
2024	4,349
2025	2,598
2026 and thereafter	3,485
Total	\$ 17,889

Certain lease agreements have rent escalation provisions over the lives of the leases. The Company recognizes rental expense based on a straight-line basis over the term of the leases. Rental expense was \$1.1 million and \$1.2 million for the three months ended March 31, 2022 and 2021, respectively, which is included within "General and administrative" expenses in the Consolidated Statements of Operations.

N3TWORK, Inc.

On November 22, 2021, the Company entered into agreements with N3TWORK Inc. and The Tetris Company, LLC pursuant to which the Company acquired the rights to develop and operate Tetris®-branded mobile games for an initial term through August 2024. The Company paid N3TWORK Inc. \$13.0 million at closing and agreed to pay up to an additional \$34.0 million subject to satisfaction of certain conditions (the "Contingent Payments"). As of March 31, 2022, the Company advanced \$0.0 million of the Contingent Payments (the "Advance Payment"). None of the Advance Payment was considered earned as of March 31, 2022, which is included within "Other long-term assets" within the Consolidated Balance Sheets.

Other

The Company is party to ordinary and routine litigation incidental to its business. On a case-by-case basis, the Company engages inside and outside counsel to assess the probability of potential liability resulting from such litigation. After making such assessments, the Company makes an accrual for the estimated loss only when the loss is reasonably probable and an amount can be reasonably estimated. The Company does not expect the outcome of any pending litigation to have a material effect on the Company's Consolidated Balance Sheets, Consolidated Statements of Operations, or Consolidated Statements of Cash Flows.

In May 2021, the Company became party to a litigation matter brought by TeamSava d.o.o. Beograd ("TeamSava") and other related parties. The plaintiffs filed a Statement of Claim in May 2021 in Tel Aviv District Court in Israel, alleging claims, among other things, that the Company breached the terms of a commercial contract relating to services provided by TeamSava and related parties in connection with the sourcing and administrative management of personnel in Serbia who provided game development services exclusively for the Company. The pending litigation seeks damages of 27.3 million New Israeli Shekels ("NIS"). The Company believes that the claims are without merit and the Company intends to vigorously defend against them; however, there can be no assurance that the Company will be successful in the defense of this litigation. The Company's range of possible loss could be up to 27.3 million NIS based on the claim amount of the litigation, but the Company is not able to reasonably estimate the probability or amount of loss and therefore has not made any accruals.

On April 6, 2022, a class action lawsuit was filed in the United States District Court, Northern District of California, by a purported Company shareholder in connection with alleged federal securities violations: Christian A. Felipe et. al. v. PLAYSTUDIOS, Inc. (the "Felipe Complaint"). The Felipe Complaint names the Company and Andrew Pascal, the Company's Chairman and CEO as defendants. The Felipe Complaint alleges misrepresentations and omissions regarding the state of the Company's development of the Kingdom Boss game and its financial projections and future prospects in the S-4 Registration Statement filed by Acies that was declared effective on May 25, 2021, the Proxy Statement filed by Acies on May 25, 2021, and other public statements that touted Old PLAYSTUDIOS' and the Company's financial performance and operations, including statements made on earnings calls and the Amended S-1 Registration Statement filed by the Company that was declared effective on July 30, 2021. The Felipe Complaint alleges that the misrepresentations and omissions resulted in stock price drops of 13% on August 12, 2021, and 5% on February 25, 2022, following (i) the Company's release of financial results for the second quarter of 2021, ended on June 30, 2021, and (ii) the filing of the Company's annual report for 2021 and issuance of a press release summarizing financial results for the fourth quarter and year ended December 31, 2021, respectively. The Felipe Complaint seeks an award of damages for an unspecified amount. The Company believes that the claims are without merit and the Company intends to vigorously defend against them; however, there can be no assurance

that the Company will be successful in the defense of this litigation. The Company is not able to reasonably estimate the probability or amount of loss and therefore has not made any accruals.

NOTE 15—STOCKHOLDERS' EQUITY

The condensed consolidated statements of stockholders' equity reflect the reverse recapitalization as discussed in Note 1—*Background and Basis of Presentation* as of June 21, 2021. As Old PLAYSTUDIOS was deemed the accounting acquirer in the reverse recapitalization with Acies, all periods prior to the consummation date reflect the balances and activity of Old PLAYSTUDIOS. The consolidated balances and the audited consolidated financial statements of Old PLAYSTUDIOS, as of December 31, 2020, and the share activity and per share amounts in these condensed consolidated statements of equity were retroactively adjusted, where applicable, using the recapitalization exchange ratio of approximately 0.233 for Old PLAYSTUDIOS common stock. Old PLAYSTUDIOS Series A Preferred Stock, Old PLAYSTUDIOS Series B Preferred Stock, Old PLAYSTUDIOS Series C-1 Preferred Stock, and Old PLAYSTUDIOS Series C Preferred Stock were deemed converted into shares of Old PLAYSTUDIOS common stock at a share conversion factor of 1.0 as a result of the reverse recapitalization. Old PLAYSTUDIOS warrants to purchase preferred stock were deemed exercised and the underlying shares converted based on the respective preferred stock conversion ratio.

Common Stock

As of March 31, 2022, the Company was authorized to issue 2.0 billion and 25.0 million shares of Class A and Class B common stock, respectively. The Company had 110.3 million and 110.1 million shares of Class A common stock and 16.1 million and 16.1 million shares of Class B common stock issued and outstanding as of March 31, 2022 and December 31, 2021, respectively.

Subject to the prior rights of the holders of any preferred stock, the holders of common stock are entitled to receive dividends out of the funds legally available at the times and in the amounts determined by the Company's Board of Directors. Each holder of Class A common stock is entitled to one vote for each share of Class A common stock held and each holder of Class B common stock is entitled to twenty votes for each share of Class B common stock held. After the full preferential amounts due to preferred stockholders have been paid or set aside, the remaining assets of the Company available for distribution to its stockholders, if any, are distributed to the holders of common stock ratably in proportion to the number of shares of common stock then held by each such holder. None of the Company's common stock is entitled to preemptive rights and neither is subject to redemption. The Company's common stock is not convertible into any other shares of the Company's capital stock.

The shares of Class B common stock are subject to a "sunset" provision if any member of the Founder Group transfers shares of Class B common stock outside the Founder Group (except for certain permitted transfers). In the event of such non-permitted transfers, any share transferred will automatically convert into shares of Class A common stock. In addition, the outstanding shares of Class B common stock will be subject to a "sunset" provision by which all outstanding shares of Class B common stock will automatically convert into shares of Class A common stock (i) if holders representing a majority of the Class B common stock vote to convert the Class B common stock into Class A common stock, (ii) if the Founder Group and its permitted transferees collectively no longer beneficially own at least 20% of the number of shares of Class B common stock collectively held by the Founder Group as of the Effective Time, or (iii) on the nine-month anniversary of the Founder's death or disability, unless such date is extended by a majority of independent directors.

Accumulated Other Comprehensive Income

The following tables shows a summary of changes in accumulated other comprehensive income:

	Currency Translation Adjustment	Total Accumulated Other Comprehensive Income
Balance as of December 31, 2021	\$ 393	\$ 393
Foreign currency translation	(6)	(6)
Balance as of March 31, 2022	<u>\$ 387</u>	<u>\$ 387</u>

	Currency Translation Adjustment	Total Accumulated Other Comprehensive Income
Balance as of December 31, 2020	\$ 481	\$ 481
Foreign currency translation	(296)	(296)
Balance as of March 31, 2021	<u>\$ 185</u>	<u>\$ 185</u>

Stock Repurchase Program

On November 10, 2021, the Company's Board of Directors approved a stock repurchase program authorizing the Company to purchase up to \$0.0 million of the Company's Class A common stock over a period of 12 months. Subject to applicable rules and regulations, the shares may be purchased from time to time in the open market or in privately negotiated transactions. Such purchases will be at times and in amounts as the Company deems appropriate, based on factors such as market conditions, legal requirements and other business considerations. As of March 31, 2022, the Company has not repurchased any Class A common stock under the stock repurchase program.

NOTE 16—STOCK-BASED COMPENSATION

2011 and 2021 Equity Incentive Plans

The Company has two equity incentive plans: Old PLAYSTUDIOS' 2011 Omnibus Stock and Incentive Plan (the "2011 Plan") and the 2021 Equity Incentive Plan (the "2021 Plan"). The 2021 Plan provides for the grant of non-qualified stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and other stock awards, and performance awards to employees, officers, non-employee directors and independent service providers of the Company. The 2021 Plan became effective immediately upon the closing of the Business Combination and replaces the 2011 Plan and no additional awards will be available under the 2011 Plan.

Each Old PLAYSTUDIOS stock option from the 2011 Plan that was outstanding immediately prior to the Business Combination and held by current employees or service providers, whether vested or unvested, was converted into an option to purchase approximately 0.233 shares of common stock (each such option, an "Exchanged Option"). Except as specifically provided in the Merger Agreement, following the Business Combination, each Exchanged Option continues to be governed by the same terms and conditions (including vesting and exercisability terms) as were applicable to the corresponding former Old PLAYSTUDIOS option immediately prior to the consummation of the Business Combination. All equity awards activity was retroactively restated to reflect the Exchanged Options.

The number of shares of common stock available under the 2021 Plan will increase annually on the first day of each calendar year, beginning with the calendar year ending December 31, 2022, with such annual increase equal to the lesser of (i) 5% of the number of shares of common stock issued and outstanding on the last business day of the immediately preceding fiscal year and (ii) an amount determined by the Company's Board of Directors. If any award (or any award under the 2011 Plan) is forfeited, cancelled, expires, terminates or otherwise lapses or is settled in cash, in whole or in part, without the delivery of Class A common stock or Class B common stock, then the shares (including both the Class A common stock and Class B common stock) covered by such forfeited, expired, terminated or lapsed award shall again be available as shares for grant under the 2021 Plan.

As of March 31, 2022, the Company has 15.7 million shares of Class A common stock reserved for issuance under the 2021 Plan.

Stock-Based Compensation

The following table summarizes stock-based compensation expense that the Company recorded in income (loss) from operations for the periods shown:

	Three Months Ended March 31,	
	2022	2021
Selling and marketing	\$ 319	\$ 21
General and administrative	3,149	383
Research and development	3,400	496
Stock-based compensation expense	<u>\$ 6,868</u>	<u>\$ 900</u>
Capitalized stock-based compensation	<u>\$ 1,101</u>	<u>\$ 209</u>

Stock Options

All of the options granted under the 2011 Plan have time-based vesting periods vesting over a period of three to four years and a maximum term of 10 years from the grant date.

The following is a summary of stock option activity for time-based and performance-based options for the three months ended March 31, 2022 (in thousands, except weighted-average exercise price and remaining term):

	No. of Options	Weighted-Average Exercise Price	Weighted-Average Remaining Term (in Years)	Aggregate Intrinsic Value
Outstanding - December 31, 2021	14,749	\$ 0.85		
Granted	—	—		
Exercised	(113)	1.15		
Forfeited	(85)	2.06		
Expired	(64)	1.74		
Outstanding - March 31, 2022	14,487	0.84	6.0	\$ 58,490
Unvested - March 31, 2022	3,141	0.85	7.3	12,803
Exercisable - March 31, 2022	11,346	0.83	5.6	45,687

As of March 31, 2022, there was approximately \$4.9 million of total unrecognized compensation expense related to stock options to employees. As of March 31, 2022, this cost is expected to be recognized over a remaining average period of 1.4 years. The total intrinsic value of stock options exercised under the provisions of the 2011 Plan during the three months ended March 31, 2022 and 2021, was \$0.4 million and \$4.9 million, respectively.

Restricted Stock Units ("RSUs")

During the three months ended March 31, 2022, the Company approved the issuance of 7.9 million RSUs. Generally, RSUs are granted using a three or four year vesting schedule, either vesting pro rata annually or a cliff vest over the requisite service period, subject to continued employment. Except as provided in an award agreement between the Company and the employee, if an employee is terminated (voluntarily or involuntarily), any unvested awards as of the date of termination will be forfeited. RSUs settle for outstanding shares of the Company's Class A common stock upon vesting.

During the three months ended March 31, 2022, the Company accelerated the first year vesting for several employees, resulting in 0.2 million RSUs vesting during the same period.

The following is a summary of RSU activity for the three months ended March 31, 2022:

	No. of RSUs
Outstanding - December 31, 2021	—
Granted	7,871
Vested	(160)
Forfeited	(21)
Outstanding - March 31, 2022	<u>7,690</u>

As of March 31, 2022, there was approximately \$26.0 million of total unrecognized compensation expense related to RSUs granted to employees and this cost is expected to be recognized over a remaining average period of 2.6 years.

NOTE 17—NET (LOSS) INCOME PER SHARE

Basic net (loss) income per share is computed by dividing net (loss) income attributable to Class A and Class B common stockholders by the weighted-average number of shares of each respective class of common stock outstanding during the period. Diluted net (loss) income per share is computed by dividing net (loss) income attributable to Class A and Class B common stockholders by the weighted-average number of each respective class of common stock outstanding, including the potential dilutive securities. For the calculation of diluted net (loss) income per share, net (loss) income attributable to Class A and Class B common stockholders is adjusted to reflect the potential effect of dilutive securities.

As result of the reverse recapitalization, the Company has retroactively adjusted the weighted average shares outstanding prior to the Business Combination to give effect to the Exchange Ratio used to determine the number of shares of common stock into which they were converted.

The following table sets forth the computation of basic and diluted net (loss) income attributable to Class A and Class B common stockholders per share (in thousands except per share data):

	Three Months Ended March 31, 2022		Three Months Ended March 31, 2021	
	Class A	Class B	Class A	Class B
Numerator				
Net (loss) income attributable to common stockholders – basic	\$ (21,992)	\$ (3,220)	\$ 4,721	\$ 1,197
Potential dilutive effect of stock options	—	—	72	(72)
Net (loss) income attributable to common stockholders – diluted	\$ (21,992)	\$ (3,220)	\$ 4,793	\$ 1,125
Denominator				
Weighted average shares of common stock outstanding - basic	110,207	16,130	74,832	18,977
Potential dilutive effect of stock options	—	—	14,220	1,922
Weighted average shares of common stock outstanding - diluted	110,207	16,130	89,052	20,899
Net (loss) income attributable to common stockholders per share				
Basic	\$ (0.20)	\$ (0.20)	\$ 0.06	\$ 0.06
Diluted	\$ (0.20)	\$ (0.20)	\$ 0.05	\$ 0.05

For the periods presented above, the net (loss) income per share amounts are the same for Class A and Class B common stock because the holders of each class are entitled to equal per share dividends or distributions in liquidation in accordance with the Certificate of Incorporation. The undistributed (losses) earnings for each period are allocated based on the contractual participation rights of the Class A and Class B common stock as if the (losses) earnings for the period had

been distributed. As the liquidation and dividend rights are identical, the undistributed (losses) earnings are allocated on a proportionate basis.

The following equity awards outstanding at the end of each period presented have been excluded from the computation of diluted net (loss) income per share of common stock for the periods presented due to their anti-dilutive effect:

	Three Months Ended March 31,	
	2022	2021
Stock options	14,486	206
RSUs	7,690	—
Public Warrants	7,175	—
Private Warrants	3,821	—
Earnout Shares	15,000	—
	48,172	206

NOTE 18—EMPLOYEE BENEFIT PLAN

The Company offers a 401(k) retirement savings plan to eligible employees. Employee contributions are voluntary and made on a pretax basis subject to Internal Revenue Service limitations. Beginning in the second quarter of 2022, the Company will provide a match a percentage of employee contributions up to certain limits.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis provides information which management believes is relevant to an assessment and understanding of our condensed consolidated results of operations and financial condition. The discussion should be read in conjunction with the unaudited condensed consolidated financial statements and notes thereto contained in this Quarterly Report on Form 10-Q. This discussion contains forward-looking statements and involves numerous risks and uncertainties, including, but not limited to, those described in the “Risk Factors” section of this Quarterly Report on Form 10-Q. Actual results may differ materially from those contained in any forward-looking statements. Unless the context otherwise requires, references to “we”, “us”, “our”, and “the Company” are intended to mean the business and operations of PLAYSTUDIOS, Inc. and its consolidated subsidiaries.

Our actual results and the timing of certain events may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such a discrepancy include, but are not limited to, those discussed elsewhere in this Quarterly Report on Form 10-Q, particularly in the section titled “Risk Factors” set forth in Part II, Item 1A of this Quarterly Report on Form 10-Q. All forward-looking statements in this report are based on information available to us as of the date hereof, and we assume no obligation to update any such forward-looking statements to reflect future events or circumstances, except as required by law.

Overview

We are a developer and publisher of free-to-play casual games for mobile and social platforms each of which incorporate our unique playAWARDS loyalty program. Over our ten-year history, we developed a portfolio of free-to-play social casino games that are considered to be among the most innovative and unique in the genre. They include the award-winning *POP! Slots*, *myVEGAS Slots*, *my KONAMI Slots*, *myVEGAS Blackjack*, *myVEGAS Bingo* and *MGM Slots Live*. Our games are based on original content, real-world slot game content, as well as third-party licensed brands and are downloadable and playable for free on multiple social and mobile-based platforms, including the Apple App Store, Google Play Store, Amazon Appstore, and Facebook.

Each of our games is powered by our proprietary *playAWARDS* program and incorporates loyalty points that are earned by players as they engage with our games. These loyalty points enable our players to earn real-world rewards from a portfolio of entertainment, retail, technology, travel, leisure, and gaming brands across the globe. The rewards are provided by our collection of awards partners, all of whom provide their rewards at no cost to us, in exchange for product integration, marketing support, and participation in our loyalty program. The program is enabled by our *playAWARDS* platform which consists of a robust suite of tools that enable our awards partners to manage their rewards in real time, measure the value of our players’ engagement, and gain insight into the effectiveness and value they derive from the program. Through our self-service platform, awards partners can launch new rewards, make changes to existing offers, and in real time see how players are engaging with their brands. The platform tools also provide awards partners the ability to measure the off-line value our players generate as consumers and patrons of their real-world establishments.

PLAYSTUDIOS’ *playAWARDS* platform embodies all of the features, tools, and capabilities needed to deliver loyalty programs tailored for the games industry. Our consumer-facing brand for our loyalty program is *myVIP*. The *myVIP* program is an aspirational benefits framework, with in-game mechanics and rewards features, along with a player development and hosting program. The program dynamically ranks and assigns players to tiers based on their accumulation of tier points, which are a proxy for their overall engagement with our games. The tier points are separate from and are not interchangeable with the loyalty points earned in the *playAWARDS* program. Qualified players are provided access to enhanced benefits that increase with each tier. Higher tiers provide access to a VIP player portal whereby players can view and purchase special chip bundles, redeem loyalty points for a curated set of rewards, and communicate directly with a dedicated personal host. The VIP player portal, concierge, and host programs, enhance the in-game and real-world reward experience with both in-game and in-person, invitation-only special events. We believe that the *myVIP* program drives increased player engagement and retention, and therefore extends each game’s life-cycle and revenue potential.

We have primarily generated our revenue from the sale of virtual currency, which players can choose to purchase at any time to enhance their playing experience. Once purchased, our virtual currency cannot be withdrawn from the game, transferred from one game to another or from one player to another, or be redeemed for monetary value. Players who install our games receive free virtual currency upon the initial launch of the game, and they may also collect virtual currency free of charge at periodic intervals or through targeted marketing promotions. Players may exhaust the free virtual currency and may choose to purchase additional virtual currency. Additionally, players can send free “gifts” of virtual currency to their friends on Facebook. Our revenue from virtual currency has been generated world-wide, but is largely concentrated in North America.

We also generate revenue from in-game advertising. Advertisements can be in the form of an impression, click-throughs, banner ads, or offers, where players are rewarded with virtual currency or loyalty points for watching a short video.

Impact of COVID-19

The ongoing COVID-19 pandemic and variants thereof and resulting social distancing, shelter-in-place, quarantine, and similar governmental orders put in place around the world have caused widespread disruption in global economies, productivity, and financial markets and have materially altered the way in which we conduct our day-to-day business. We have followed guidance by the U.S., Israel, Hong Kong, and other applicable foreign and local governments to protect our employees and operations during the pandemic and have implemented a remote environment for our business. We cannot predict the potential impacts of the COVID-19 pandemic and variants thereof or the distribution of vaccines on our business or operations, but we will continue to actively monitor the related issues and may take further actions that alter our business operations, including as may be required by federal, state, local, or foreign authorities or that we determine are in the best interests of our employees, players, partners, and stockholders.

In addition to the potential direct impacts to our business, the global economy has been, and is likely to continue to be, significantly weakened as a result of the actions taken in response to the COVID-19 pandemic and variants thereof, and future government intervention remains uncertain. A weakened global economy may impact our players and their purchasing decisions within our games, in particular as a result of the limitations associated with redeeming real-world rewards due to government-mandated or other restrictions on travel and other activities and limitations on our players' discretionary spending, consumer activity during the pandemic and its impact on advertising investments, and the ability of our business partners, including our awards partners, to navigate this complex social, health, and economic environment, any of which could result in disruption to our business and results of our operations.

The duration and extent of the impact from the COVID-19 pandemic and variants thereof depends on future developments that cannot be accurately predicted at this time, such as the severity and transmission rate of the virus, the existence of any additional waves of the COVID-19 pandemic and variants thereof, the extent and effectiveness of containment actions, progress towards widespread rapid testing, effective treatment alternatives, and the success and timing of vaccination efforts, and the impact of these and other factors on our employees, players, and business partners. We have recently observed labor shortages, increasing competition for talent, and increasing employee attrition. If we are not able to respond to and manage the impact of such events effectively, our business may be harmed.

See "Risk Factors" for more information related to the COVID-19 pandemic.

Key Factors Affecting Our Performance

There are a number of factors that affect the performance of our business, and the comparability of our results from period to period, including:

- *Third-Party Platform Agreements*—We derive substantially all of our revenue from in-game purchases of virtual currency that are processed by platform providers such as the Apple App Store, Google Store, Amazon Appstore, and on Facebook. The platform providers charge us a transaction fee to process payments from our players for their purchase of in-game virtual currency. These platform fees are generally set at 30% of the in-game purchase. Each platform provider has broad discretion to set its platform fees and to change and interpret its terms of service and other policies with respect to us and other developers in its sole discretion, and those changes may be unfavorable to us.
- *Player Acquisition*—*Establishing and maintaining a loyal network of players and paying players is vital for our success.* As such, we spend a significant amount on advertising and other forms of player acquisition, such as traditional marketing and advertising, email and push notifications, and cross promoting between our games in order to grow our player base. These expenditures are generally related to new content launches, game enhancements, and ongoing programs to drive new player acquisition and the reactivation of lapsed player engagement. Our player acquisition strategy is centered on a payback period methodology, and we strive to optimize spend between the acquisition of new players and the reactivation of inactive players.
- *Player Monetization*—*Our revenue has been primarily driven through the sale of virtual currency.* Paying players purchase virtual currency in our games because of the perceived value, which is dependent on the relative ease of obtaining equivalent virtual currency by simply playing our game. The perceived value of our virtual currency can be impacted by various actions that we take in our games including offering discounts for virtual currency or giving away virtual currency in promotions. Managing game economies is difficult and relies on our assumptions and judgment. If we fail to manage our virtual economies properly or fail to promptly and successfully respond to any such disruption, our

reputation may suffer and our players may be less likely to play our games and to purchase virtual currency from us in the future, which would cause our business, financial condition, and results of operations to suffer.

- *Investment in Game Development*—In order to maintain interest from existing players and add new players and achieve our desired revenue growth, we must continually improve the content, offers, and features in our existing games and the release of new games. As a result, we invest a significant amount of our technological and creative resources to ensure that we support an appropriate cadence of innovative content that our players will find appealing. These expenditures generally occur in advance of the release of new content or the launch of a new game, and the resulting revenue may not exceed the development costs, or the game or feature may be abandoned in its entirety.
- *Investment in our playAWARDS and myVIP programs*—In order to drive player engagement and retention we invest a significant amount of resources to enhance the playAWARDS and myVIP programs. We continually evaluate these programs through an iterative feedback process with our players and awards partners and update them so that both our players and awards partners are able to optimize their personalized experience. As a result, we continuously incur expenses to enhance and update these programs. However, the results may not generate revenue and the enhancements may require additional significant modifications or be abandoned in their entirety.
- *Real-World Rewards*—We currently offer real-world rewards relating to, among other things, dining, live entertainment shows, and hotel rooms, and we plan to continue to expand and diversify our rewards loyalty program in order to maintain and enhance the perceived value offering to our players. Our players' willingness to make in-game purchases is directly impacted by our ability to provide desirable rewards. The real-world rewards we offer to our players are provided at no cost to us by our awards partners, and there is no obligation for us to pay or otherwise compensate either our awards partners or players for any player redemptions under our awards partner agreements.

Key Performance Indicators and Non-GAAP Measures

We manage our business by regularly reviewing several key operating metrics to track historical performance, identify trends in player activity, and set strategic goals for the future. Our key performance metrics are impacted by several factors that could cause them to fluctuate on a quarterly basis, such as platform providers' policies, seasonality, player connectivity, and the addition of new content to games. We believe these measures are useful to investors for the same reasons. In addition, we also present certain non-GAAP performance measures. These performance measures are presented as supplemental disclosure and should not be considered superior to or as a substitute for the consolidated financial statements prepared under U.S. GAAP. The non-GAAP measures presented in this Quarterly Report on Form 10-Q should be read together with the unaudited condensed consolidated financial statements and the respective related notes thereto included elsewhere in this Quarterly Report on Form 10-Q. The key performance indicators and non-GAAP measures presented in this Quarterly Report on Form 10-Q may differ from similarly titled measures presented by other companies and are not a substitute for financial statements prepared in accordance with U.S. GAAP.

Key Performance Indicators

Daily Active Users ("DAU")

DAU is defined as the number of individuals who played a game on a particular day. We track DAU by the player ID, which is assigned for each game installed by an individual. As such, an individual who plays two different games on the same day is counted as two DAU while an individual who plays the same game on two different devices is counted as one DAU. Average DAU is calculated as the average of the DAU for each day during the period presented. We use DAU as a measure of audience engagement to help us understand the size of the active player base engaged with our games on a daily basis.

Monthly Active Users ("MAU")

MAU is defined as the number of individuals who played a game in a particular month. As with DAU, an individual who plays two different games in the same month is counted as two MAU while an individual who plays the same game on two different devices is counted as one MAU. Average MAU is calculated as the average of MAU for each calendar month during the period presented. We use MAU as a measure of audience engagement to help us understand the size of the active player base engaged with our games on a monthly basis.

Daily Paying Users (“DPU”)

DPU is defined as the number of individuals who made a purchase in a mobile game during a particular day. As with DAU and MAU, we track DPU based on account activity. As such, an individual who makes a purchase on two different games in a particular day is counted as two DPU while an individual who makes purchases in the same game on two different devices is counted as one DPU. Average DPU is calculated as the average of the DPU for each day during the period presented. We use DPU to understand the size of our active player base that makes in-game purchases. This focus directs our strategic goals in setting player acquisition and pricing strategy.

Daily Payer Conversion

Daily Payer Conversion is defined as DPU as a percentage of DAU on a particular day. Average Daily Payer Conversion is calculated as the average DPU divided by average DAU for a given period. We use Daily Payer Conversion to understand the monetization of our active players.

Average Daily Revenue Per DAU (“ARPDau”)

ARPDau is defined for a given period as the average daily revenue per average DAU, and is calculated as game and advertising revenue for the period, divided by the number of days in the period, divided by the average DAU during the period. We use ARPDau as a measure of overall monetization of our players.

Non-GAAP Measures*Adjusted EBITDA (“AEBITDA”) and AEBITDA Margin*

Adjusted EBITDA, or AEBITDA, as used herein, is a non-GAAP financial performance measure that is presented as a supplemental disclosure and is reconciled to net (loss) income as the most directly comparable GAAP measure. We define AEBITDA as net (loss) income before interest, income taxes, depreciation and amortization, restructuring and related costs (consisting primarily of severance and other restructuring related costs), stock-based compensation expense, changes in fair value of warrant liabilities and other income and expense items (including special infrequent items, foreign currency gains and losses, and other non-cash items). We also use AEBITDA Margin, another non-GAAP measure, which we calculate as the percentage of AEBITDA to revenue.

We use AEBITDA and AEBITDA Margin to monitor and evaluate the performance of our business operations, facilitate internal comparisons of our operating performance, and to analyze and evaluate decisions regarding future budgets and initiatives. We believe that both measures are useful because they provide investors with information regarding our operating performance that is used by our management in its reporting and planning processes. Adjusted EBITDA and Adjusted EBITDA Margin as calculated herein may not be comparable to similarly titled measures and disclosures reported by other companies.

The following table sets forth the reconciliation of AEBITDA and AEBITDA Margin to net (loss) income and net (loss) income margin, the most directly comparable GAAP measure (in thousands, except percentages).

	Three Months Ended March 31,	
	2022	2021
Net (loss) income	\$ (25,212)	\$ 5,918
Depreciation & amortization	8,394	6,034
Income tax expense	7,835	1,348
Stock-based compensation expense	6,868	900
Change in fair value of warrant liability	2,716	—
Restructuring and related ⁽¹⁾	8,655	56
Other ⁽²⁾	(182)	284
AEBITDA	9,074	14,540
GAAP Revenue	70,451	74,097
Margin as a % of revenue		
Net (loss) income margin	(35.8)%	8.0 %
AEBITDA Margin	12.9 %	19.6 %

(1) Amounts reported during the three months ended March 31, 2022 and 2021 consist of severance-related costs and amounts reported during the three months ended March 31, 2022 consist of (i) non-cash impairment charge related to the suspension of Kingdom Boss development, (ii) fees related to potential mergers and acquisitions, and (iii) fees related to the Tender Offer for the Warrants.

(2) Amounts reported in "Other" include interest expense, interest income, gains/losses from equity investments, foreign currency gains/losses, and non-cash gains/losses on the disposal of assets.

Results of Operations

Summarized Consolidated Results of Operations

The following table summarizes our consolidated results of operations for the three months ended March 31, 2022 and 2021 (in thousands, except percentages):

	Three Months Ended March 31,			
	2022	2021	\$ Change	% Change
Net revenue	\$ 70,451	\$ 74,097	\$ (3,646)	(4.9)%
Operating expenses	85,294	66,547	18,747	28.2 %
Operating (loss) income	(14,843)	7,550	(22,393)	(296.6)%
Net (loss) income	(25,212)	5,918	(31,130)	(526.0)%
AEBITDA	9,074	14,540	(5,466)	(37.6)%
Net (loss) income margin	(35.8)%	8.0 %	(43.8)	(547.5)%
AEBITDA margin	12.9 %	19.6 %	(6.7)	(34.2)%

Revenue and Key Performance Indicators (in thousands, except percentages and ARPDau)

	Three Months Ended March 31,		Change	% Change
	2022	2021		
Virtual currency	\$ 65,935	\$ 73,226	\$ (7,291)	(10.0)%
Advertising	4,075	871	3,204	367.9 %
Other revenue	441	—	441	N/A
Net revenue	\$ 70,451	\$ 74,097	\$ (3,646)	(4.9)%
Average DAU	1,555	1,259	296	23.5 %
Average MAU	6,913	3,733	3,180	85.2 %
Average DPU	31	36	(5)	(13.9)%
Average Daily Payer Conversion	2.0 %	2.9 %	(0.9pp)	(31.0)%
ARPDau (in dollars)	\$ 0.50	\$ 0.65	\$ (0.15)	(23.1)%

pp = percentage points

Revenue information by geography is summarized as follows (in thousands, except percentages):

	Three Months Ended March 31,		Change	% Change
	2022	2021		
United States	\$ 62,103	\$ 64,073	\$ (1,970)	(3.1)%
North America (excluding United States)	3,691	4,146	(455)	(11.0)%
Other	4,657	5,878	(1,221)	(20.8)%
Net revenue	\$ 70,451	\$ 74,097	\$ (3,646)	(4.9)%

Net revenue decreased \$3.6 million, or 4.9%, to \$70.5 million during the three months ended March 31, 2022 compared to \$74.1 million during the three months ended March 31, 2021. The decrease is a result of \$7.3 million decrease in virtual currency primarily driven by decreases in DPU and ARPDau despite overall increases in DAU and MAU, partially offset by an increase of \$3.2 million in advertising revenue. DAU and MAU increased 23.5% and 85.2% respectively compared to three months ended March 31, 2021, driven by the addition of new applications, Tetris and MGM Slots Live. Our daily conversion rate and ARPDau both decreased compared to three months ended March 31, 2021 due to addition of high-volume, low-monetizing Tetris application diluting both metrics.

Operating Expenses

The following table summarizes our consolidated operating expenses for each applicable period (in thousands, except percentages):

	Three Months Ended March 31,		\$ Change	% Change	% of Revenue	
	2022	2021			2022	2021
Operating expenses:						
Cost of revenue	\$ 21,033	\$ 24,488	\$ (3,455)	(14.1)%	29.9 %	33.0 %
Selling and marketing	20,540	17,000	3,540	20.8 %	29.2 %	22.9 %
Research and development	16,981	14,746	2,235	15.2 %	24.1 %	19.9 %
General and administrative	9,691	4,223	5,468	129.5 %	13.8 %	5.7 %
Depreciation and amortization	8,394	6,034	2,360	39.1 %	11.8 %	8.2 %
Restructuring expenses	8,655	56	8,599	15355.4 %	12.3 %	0.1 %
Total operating expenses	\$ 85,294	\$ 66,547	\$ 18,747	28.2 %	121.1 %	89.8 %

Cost of Revenue

Cost of revenue decreased by \$3.5 million, or 14.1%, to \$21.0 million during the three months ended March 31, 2022 compared to \$24.5 million during the three months ended March 31, 2021, primarily due to the decrease in virtual

currency revenue which decreased our platform fees. As a percentage of revenue, cost of revenue decreased from 33.0% for the three months ended March 31, 2021 to 29.9% for the three months ended March 31, 2022. The decrease was primarily related to an increase in advertising revenue which does not incur platform fees, and a reduction in royalty expenses associated with our revenue.

Selling and Marketing

Selling and marketing expenses increased by \$3.5 million, or 20.8%, to \$20.5 million during the three months ended March 31, 2022 compared to \$17.0 million during the three months ended March 31, 2021. The increase was primarily due to increased user acquisition costs of \$2.7 million, primarily related to MGM Slots Live, \$0.2 million of catch up stock based compensation related to certain RSU grants, and marketing payroll of \$0.2 million. As a percentage of revenue, selling and marketing expenses increased from 22.9% for the three months ended March 31, 2021 to 29.2% for the three months ended March 31, 2022.

Research and Development

Research and development expenses increased by \$2.2 million, or 15.2%, to \$17.0 million during the three months ended March 31, 2022 compared to \$14.7 million during the three months ended March 31, 2021. The increase was primarily due to \$2.6 million of catch up stock based compensation related to certain RSU grants, offset by a decrease of \$1.4 million outside services related to development of *Kingdom Boss* and *myVEGAS Bingo*.

General and Administrative

General and administrative expenses increased by \$5.5 million, or 129.5%, to \$9.7 million during the three months ended March 31, 2022 compared to \$4.2 million during the three months ended March 31, 2021. The increase was primarily due to \$1.9 million of catch up stock based compensation related to certain RSU grants, \$1.0 million related to D&O insurance, and \$1.0 million in additional payroll expense.

Depreciation and Amortization

Depreciation and amortization expenses increased by \$2.4 million, or 39.1%, to \$8.4 million during the three months ended March 31, 2022 compared to \$6.0 million during the three months ended March 31, 2021. The increase was primarily due to the launch of *myVEGAS Bingo* in March 2021 and the addition of *Tetris* in November 2021. See Note 7—*Internal-Use Software, Net* in our condensed consolidated financial statements.

Restructuring Expenses

Restructuring expenses increased by \$8.6 million from the three months ended March 31, 2021 to the three months ended March 31, 2022. The increase is due to the non-cash impairment charge related to the suspension of *Kingdom Boss* development, fees related to merger and acquisition expenses, and fees related to the Tender Offer for the Warrants.

Other Expense, Net

The following table summarizes our consolidated non-operating expense for each applicable period (in thousands, except percentages):

	Three Months Ended March 31,		\$ Change	% Change
	2022	2021		
Change in fair value of warrant liabilities	\$ (2,716)	\$ —	\$ (2,716)	N/A
Interest expense	(5)	(42)	37	88.1 %
Other (expense) income	187	(242)	429	(177.3)%
Total other expense, net	\$ (2,534)	\$ (284)	\$ (2,250)	792.3 %

The change in fair value of warrant liabilities is related to the warrants discussed in Note 7—*Warrant Liabilities* to our consolidated financial statements herein. Interest expense is related to the unused commitment fees and debt issue costs associated with the Credit Agreement and the Private Venture Growth Capital Loan, respectively, as discussed in Note 12—

Long-Term Debt to our consolidated financial statements herein. Other (expense) income primary relates to gains or (losses) from equity investments and gains or (losses) from foreign currency transactions with our foreign subsidiaries.

Provision for Income Taxes

Provision for income taxes resulted in a tax expense of \$7.8 million for the three months ended March 31, 2022, compared to a tax expense of \$1.3 million for the three months ended March 31, 2021. Our effective tax rate was (45.1)% for the three months ended March 31, 2022 compared to our statutory tax rate of 21%. Our effective tax rate was increased by 56.8% for R&D tax credits, 24.5% for foreign tax deductions, and 6.2% for the Vietnam tax exemption. Our effective tax rate was decreased by 5.9% for the recognition of estimated state taxes, 44.7% for non-deductible stock options, 17.2% for other non-deductible expenses, and 76.4% for foreign branch income.

Liquidity and Capital Resources

As of March 31, 2022, we had cash and cash equivalents of \$220.0 million, which consisted of cash on hand and money market mutual funds. Historically, we have funded our operations, including capital expenditures, primarily through cash flow from operating activities. We believe that our existing cash and cash equivalents, the cash generated from operations, the borrowing capacity under our Credit Agreement, and the cash we obtained as a result of the Business Combination and related PIPE Financing will be sufficient to fund our operations and capital expenditures for the foreseeable future. However, we intend to continue to make significant investments to support our business growth and may require additional funds to respond to business challenges, including the need to develop new games and features or enhance our existing games, improve our operating infrastructure, or acquire complementary businesses, personnel and technologies. Accordingly, we may need to engage in equity or debt financings to secure additional funds or we may decide to do so opportunistically.

Debt

On June 24, 2021, in connection with the Closing, Old PLAYSTUDIOS terminated and replaced its then existing revolving credit facility with Silicon Valley Bank (the "Revolver"). We, one of our subsidiaries, JPMorgan Chase Bank, N.A., as administrative agent and JPMorgan Chase Bank, N.A., Silicon Valley Bank and Wells Fargo Securities, LLC, as joint bookrunners and joint lead arrangers entered into a credit agreement (the "Credit Agreement") which provides for a five year revolving credit facility in an aggregate principal amount of \$75 million. Borrowings under the Credit Agreement may be borrowed, repaid and re-borrowed by us, and are available for working capital, general corporate purposes and permitted acquisitions. Commitment fees and interest rates are determined on the basis of either a Eurodollar rate or an Alternate Base Rate plus an applicable margin. The applicable margins are initially 2.50%, in the case of Eurodollar loans, and 1.50%, in the case of Alternate Base Rate loans. The applicable margin is subject to adjustment based upon our Total Net Leverage Ratio (as defined in the Credit Agreement). Eurodollar rates and the Alternate Base Rate are subject to floors of 0.00% and 1.00%, respectively. The Credit Agreement contains various affirmative and negative financial and operational covenants applicable to us and our subsidiaries. We are also obligated to comply with two financial maintenance covenants as of the end of each fiscal quarter, commencing with the quarter ended September 30, 2021: (i) we must maintain a Total Net Leverage Ratio not to exceed 3.50:1.00 (subject to increase to 4.00:1.00 following consummation of certain material acquisitions) and (ii) we must maintain a Fixed Charge Coverage Ratio of not less than 1.25:1.00. As of March 31, 2022, we have not drawn any amounts under the Credit Agreement.

Cash Flows

The following tables present a summary of our cash flows for the periods indicated (in thousands):

	Three Months Ended March 31,	
	2022	2021
Net cash provided by operating activities	\$ 11,585	\$ 4,798
Net cash used in investing activities	(5,107)	(11,941)
Net cash provided by (used in) financing activities	130	(2,160)
Effect of exchange rate on cash and cash equivalents	(145)	(149)
Increase (decrease) in cash and cash equivalents	6,463	(9,452)

Operating Activities

During the three months ended March 31, 2022, operating activities provided \$11.6 million of net cash as compared to \$4.8 million during the three months ended March 31, 2021. The increase in cash provided from operating activities was primarily due to a favorable change in operating assets and liabilities, including the decrease in accounts receivable of \$10.1 million due to timing fluctuations in receivables collection.

Investing Activities

Our investing activities are composed of cash used for game development and purchase of property and equipment.

During the three months ended March 31, 2022, investing activities used \$5.1 million of net cash as compared to \$11.9 million during the three months ended March 31, 2021. The decrease in investing activities was due to the purchase of \$5.0 million in notes receivable from a third-party game developer during the three months ended March 31, 2021. During the three months ended March 31, 2022, we received \$2.3 million of notes receivable. In addition, during the three months ended March 31, 2022, we purchased an additional \$1.7 million of property and equipment related to the expansion of our international studios compared to the three months ended March 31, 2021.

Financing Activities

Our cash flow from financing activities primarily consists of proceeds from the exercise of stock options.

During the three months ended March 31, 2022, financing activities provided \$0.1 million of net cash as compared to \$2.2 million of cash used in financing activities during the three months ended March 31, 2021. The change in cash provided by (used in) financing activities was due to \$3.0 million of cash payments for the Business Combination made during March 31, 2021, offset by a decrease of \$0.7 million of net proceeds from the exercise of stock options during the three months ended March 31, 2022.

Contractual Obligations, Commitments, and Contingencies

As of March 31, 2022, there had been no material changes to our aggregated indebtedness and other contractual obligations previously reported in our Annual Report on Form 10-K for the year ended December 31, 2021.

Critical Accounting Policies and Estimates

Our management's discussion and analysis of our financial condition and results of operations is based on our condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements, as well as the reported revenue generated and expenses incurred during the reporting periods. Our estimates are based on our historical experience and various other factors that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about items that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Except as described in Note 2—*Summary of Significant Accounting Policies*, there have been no material changes to our critical accounting policies and estimates as compared to the critical accounting policies and estimates disclosed in our Annual Report on Form 10-K, filed with the SEC on March 3, 2022.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of loss arising from adverse changes in market rates and prices, such as interest rates and foreign currency exchange rates. We are exposed to market risks in the ordinary course of our business. These risks primarily include interest rate risk, investment risk, and foreign currency risk as follows:

Interest Rate Risk

Our exposures to market risk for changes in interest rates relate primarily to our Credit Agreement. The Credit Agreement and our Revolver are floating rate facilities. Therefore, fluctuations in interest rates will impact the amount of interest expense we incur and have to pay. We did not have any borrowings outstanding under our Credit Agreement or Revolver at March 31, 2022 and December 31, 2021, respectively

We do not purchase or hold any derivative financial instruments for trading purposes.

Investment Risk

We had cash and cash equivalents including restricted cash and cash equivalents totaling \$220.0 million and \$213.5 million as of March 31, 2022 and December 31, 2021, respectively. Our investment policy and strategy primarily attempts to preserve capital and meet liquidity requirements without significantly increasing risk. Our cash and cash equivalents primarily consist of cash deposits and money market funds. We do not enter into investments for trading or speculative purposes. Changes in rates would primarily impact interest income due to the relatively short-term nature of our investments. A hypothetical 100 basis point change in interest rates would have increased or decreased our interest income for a twelve-month period by an immaterial amount.

Foreign Currency Risk

Our functional currency is the U.S. Dollar and our revenues and expenses are primarily denominated in U.S. Dollars. Our indirect foreign currency transaction exposure results mainly from the sale of our virtual currency to players outside of the U.S. While players outside of the U.S. make purchases in currencies other than the U.S. dollar, we are paid by platform providers and record revenue in U.S. dollars pursuant to the terms of the relevant contracts. While we have the ability to change the foreign currency pricing of our virtual currency, sudden and significant changes in the exchange rates of the Canadian and Australian dollars and Pound Sterling to the U.S. dollar could have a material impact on our results of operations. We do not hedge our foreign currency exposure but may do so in the future.

However, a significant portion of our headcount related expenses, consisting principally of salaries and related personnel expenses as well as leases and certain other operating expenses, are denominated in New Israeli Shekels, or NIS. We also have foreign currency risks related to our operating expenses denominated in currencies other than the U.S. Dollar, including the Hong Kong Dollar, Euro, Serbian Dinar, and Vietnamese Dong. Accordingly, changes in exchange rates in the future may negatively affect our future operating results as expressed in U.S. Dollars.

We have experienced and will continue to experience fluctuations in our net income as a result of transaction gains or losses related to remeasurement of our asset and liability balances that are denominated in currencies other than the functional currency of the entities in which they are recorded.

Item 4. Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving the desired control objectives and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on such evaluation, the Company's CEO and CFO have concluded that, as of the period covered by this report, the Company's disclosure controls and procedures were effective, at the reasonable assurance level, in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act and were effective in ensuring that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including the Company's CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by Rules 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the three months ended March 31, 2022 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings**

From time to time, we are a party to litigation and subject to claims incident to the ordinary course of business. Although the results of litigation and claims cannot be predicted with certainty, we currently believe that the final outcome of these matters will not have a material adverse effect on our business. Regardless of the outcome, litigation can have an adverse impact on us because of defense and settlement costs, diversion of management resources and other factors. For information regarding legal proceedings and other claims in which we are involved, see Note 14—*Commitments and Contingencies*.

Item 1A. Risk Factors

Investing in our securities involves risks. Before you make a decision to buy our securities, in addition to the risks and uncertainties discussed above under “Cautionary Note Regarding Forward-Looking Statements,” you should carefully consider the specific risks set forth herein. If any of these risks actually occur, it may materially harm our business, financial condition, liquidity and results of operations. As a result, the market price of our securities could decline, and you could lose all or part of your investment. Additionally, the risks and uncertainties described in this Quarterly Report on Form 10-Q are not the only risks and uncertainties that we face. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may become material and adversely affect our business.

Summary of Principal Risk Factors

- Our business will suffer if we are unable to entertain our players, develop new games and improve the experience of our existing games.
- If we are able to develop new games and features that achieve success, it is possible that these new games and features could divert players of our other existing games without growing our overall player base, which could harm operating results.
- We believe that our players’ level of engagement with our games is partly based on playAWARDS, our real-world rewards loyalty program. If we fail to expand and diversify our playAWARDS program, in particular given the current restrictions imposed by the COVID-19 pandemic and variants thereof, our business may suffer.
- Our industry is very competitive. If players prefer our competitors’ games over our own, our operating results could suffer.
- We rely on a small portion of our total players for a substantial amount of our revenue and if we fail to grow our player base, or if player engagement declines, our revenue and operating results will be harmed.
- We rely on third-party platforms such as the Apple App Store, Google Play Store, Amazon Appstore, and Facebook to distribute our games and collect revenues generated on such platforms and rely on third-party payment service providers to collect revenues generated on our own platforms.
- If we do not successfully invest in, establish and maintain awareness of our brands and games, if we incur excessive expenses promoting and maintaining our brands or our games, or if our games contain defects, our business, financial condition, results of operations, or reputation could be harmed.
- Our ability to acquire and maintain licenses to intellectual property may affect our revenue and profitability. Competition for these licenses may make them more expensive and increase our costs.
- We rely on information technology and other systems and platforms, and any failures, errors, defects, or disruptions in our or our vendors’ or other partners’ systems or platforms could diminish our brand and reputation, subject us to liability, disrupt our business, impact our games and related software applications, affect our ability to scale our technical infrastructure and adversely affect our operating results and growth prospects.
- We are party to existing litigation and may in the future be subject to additional litigation in the operation of our business. These matters may divert the attention of our management from the operations of our business. In addition, an adverse outcome in one or more proceedings could adversely affect our business.

- We are subject to laws and regulations concerning data privacy, information security, data protection, and consumer protection, and these laws and regulations are continually evolving. Our actual or perceived failure to comply with these laws and regulations could harm our business.
- The dual class structure of our common stock has the effect of concentrating voting power with Andrew Pascal, our Chairman of the Board and Chief Executive Officer, which limits an investor's ability to influence the outcome of important transactions, including a change in control.
- Warrants for our Class A common stock and Earnout Shares and Sponsor Shares may become issuable or vest, each of which would increase the number of shares eligible for future resale in the public market and result in dilution to our stockholders. While the Company has offered to purchase each of its Warrants in the Tender Offer, the Company does not expect that all of the Warrants will be tendered for purchase in the Tender Offer.
- The price of our Class A common stock and Public Warrants may be volatile.
- We do not intend to pay cash dividends for the foreseeable future.
- Future resales of our Class A common stock may cause the market price of our securities to drop significantly, even if our business is doing well.
- Delaware law and our organizational documents contain certain provisions, including anti-takeover provisions, that limit the ability of stockholders to take certain actions and could delay or discourage takeover attempts that stockholders may consider favorable.

Risks Related to Our Business and Industry

Our business will suffer if we are unable to entertain our players, develop new games, and improve the experience within our existing games.

Our business depends on developing, publishing, and continuing to service casual, “free-to-play” games that players will download and spend time and money playing. We are currently focused on social casino mobile gaming, offering our social casino games on mobile devices, including smartphones and tablets on Apple’s iOS and Google’s Android operating systems, and on social networking platforms such as Facebook. We have devoted and we expect to continue to devote substantial resources to the research, development, analytics, and marketing of our games. Our development and marketing efforts are focused on both improving the experience within our existing games (frequently through new content and feature releases for our live services) and developing new games. We generate revenue primarily through the sale of in-game virtual currency. For games distributed through third-party platforms, we are required to share a portion of our revenue from in-game sales with the platform providers. Due to our focus on mobile gaming, these costs are expected to remain a significant operating expense. See “Risk Factors—We rely on third-party platforms such as the Apple App Store, Google Play Store, Amazon Appstore, and Facebook to distribute our games and collect revenues generated on such platforms and rely on third-party payment service providers to collect revenues generated on our own platforms.” In order to remain profitable, we need to generate sufficient revenue from our existing and new game offerings to offset our ongoing development, marketing, and operating costs.

Successfully monetizing “free-to-play” games is difficult, and requires that we deliver engaging and entertaining player experiences that a sufficient number of players will pay for or we are able to otherwise sufficiently monetize our games. The success of our games depends, in part, on unpredictable and volatile factors beyond our control including player preferences and spending habits, competing games, and the availability of other entertainment experiences. If our games do not meet player expectations, or if new games are not brought to market in a timely and effective manner, our ability to grow revenue and our financial performance will be negatively affected.

Our ability to successfully develop games for mobile and web platforms and their ability to achieve commercial success will depend on our ability to:

- effectively market our games to existing and new players;
- achieve benefits from our player acquisition costs;
- achieve organic growth and gain player interest in our games through free or more efficient channels;
- adapt to changing player preferences and spending habits;

- negotiate with third parties to provide our players with a diverse inventory of real-world loyalty rewards;
- increase player engagement within our games;
- adapt to new technologies and feature sets for mobile and other devices;
- expand and enhance games after their initial release;
- attract, retain, and motivate talented and experienced game designers, product managers and engineers;
- negotiate with third-party platforms;
- continue to adapt game feature sets for an increasingly diverse set of mobile devices, including various operating systems and specifications, limited bandwidth, and varying processing power and screen sizes;
- efficiently manage the development of new games and features to increase the cadence of introductions without incurring excessive costs;
- achieve and maintain successful player engagement and effectively monetize our games;
- maintain a quality gaming experience and retain our players;
- compete successfully against a large and growing number of existing market participants;
- accurately forecast the timing and expense of our operations, including game and feature development, marketing and player acquisition, player adoption, and revenue growth;
- minimize and quickly resolve bugs or outages; and
- acquire and successfully integrate high quality mobile game assets, personnel, or companies.

These and other uncertainties make it difficult to know whether we will succeed in continuing to develop successful games, live operations services and launch new games and features in accordance with our operating plan. If we do not succeed in doing so, our business, financial condition, results of operations, and reputation will suffer.

If we are able to develop new games and features that achieve success, it is possible that these new games and features could divert players of our other existing games without growing our overall player base, which could harm operating results.

Although it is important to our future success that we develop new games and features that are popular with players, it is possible that new games and features may reduce the amount of time players spend with our other games. In particular, we plan to continue leveraging our existing games to cross-promote new games and features, which may encourage players of existing games to divert some of their playing time and discretionary spending away from our existing games. If new games and game features do not grow our player base, increase the overall amount of time our players spend with our games, or generate sufficient new revenue to offset any declines from our other games, our revenue could be adversely affected.

We believe that our players' level of engagement with our games is partly based on playAWARDS, our real-world rewards loyalty program. If we fail to expand and diversify our playAWARDS program, in particular given the current restrictions imposed by the COVID-19 pandemic, including variants thereof, our business may suffer.

Players accumulate loyalty points by engaging with our games, and players can exchange their loyalty points for real-world rewards through our playAWARDS program. We believe that our players' level of engagement with our games is partly based on the perceived value of earning loyalty points and exchanging those loyalty points for real-world rewards that they can redeem at our awards partners' establishments. We currently offer real-world rewards relating to, among other things, dining, live entertainment shows, and hotel rooms. For example, through an agreement with MGM Resorts International, or MGM, our players are able to exchange loyalty points for, among other things, free hotel rooms, meals and show tickets for various Las Vegas properties, including ARIA, Bellagio, and MGM Grand. We have observed a lower level of rewards redemption during the COVID-19 pandemic, including variants thereof, due to restrictions on the operations of awards partners and on the ability for players to travel or attend public events. If we are unable to expand and diversify our playAWARDS program, in particular to include real-world rewards not based on travel or attending public events or shows especially during the COVID-19 pandemic, the perceived value of exchanging loyalty points for the real-world rewards we offer will diminish and our players may be less likely to play our games or may reduce their level of engagement with our

games. Such loss of, or reduction in, players or their level of engagement with our games would cause our business, financial condition, and results of operations to suffer.

The COVID-19 pandemic, including variants thereof, and containment efforts across the globe have materially altered how individuals interact with each other and have materially affected how we and our business partners are operating, and the extent to which this situation will impact our future results of operations and overall financial performance remains uncertain.

The ongoing COVID-19 pandemic, including variants thereof, and resulting social distancing, shelter-in-place, quarantine and similar governmental orders put in place around the world have caused widespread disruption in global economies, productivity and financial markets and have materially altered the way in which we conduct our day-to-day business.

As a result of the COVID-19 pandemic, we temporarily closed our offices around the world (including our corporate headquarters in Las Vegas, Nevada) and implemented travel restrictions for our employees. Towards the end of the first calendar quarter of 2020, we implemented a remote working program across our global studios and supporting locations. As of June 28, 2021, we instituted a voluntary return to our offices in Las Vegas, Nevada, Burlingame, California and Austin, Texas, subject to compliance with CDC and local health department guidance. Our Hong Kong, Tel-Aviv, Belgrade and Hanoi offices are open, subject to certain restrictions placed by local health officials. However, the full extent to which the COVID-19 pandemic and the various responses to it impact our business, operations, and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including:

- the duration and scope of the COVID-19 pandemic, including any potential future waves of the COVID-19 pandemic;
- the impact of new COVID-19 variants;
- governmental, business, and individuals' actions that have been and continue to be taken in response to the COVID-19 pandemic;
- the availability and cost to access the capital markets;
- the effect on our players and their willingness and ability to make in-game purchases;
- the limitations on redeeming dining, live entertainment, and hotel real-world rewards due to travel and other similar restrictions;
- disruptions or restrictions on our employees' ability to work and travel;
- labor shortages, increasing competition for talent, and increasing employee attrition; and
- interruptions related to our cloud networking and platform infrastructure and partners, including impacts on Amazon Web Services, mobile application platform providers, advertising partners, and customer service and support providers.

During the continuing COVID-19 pandemic, we may not be able to provide the same level of product features and customer support that our players expect from us, which could negatively impact our business and operations. While some of our workforce have voluntarily returned to our offices, and substantially all of our business operations can be performed remotely, many of our employees who continue to work remotely face additional work-related and personal challenges, including prolonged duration of remote working environments, adjusting communication and work practices to collaborate remotely with work colleagues and business partners, managing technical and communication challenges of working from home on a daily basis, looking after children as a result of remote-learning and school closures, and caring for themselves, family members or other dependents who are or may become ill. We will continue to actively monitor the issues raised by the COVID-19 pandemic and may take further actions that alter our business operations, including as may be required by federal, state, local, or foreign authorities or that we determine are in the best interests of our employees, players, partners, and stockholders.

In addition to the potential direct impacts to our business, the global economy has been, and is likely to continue to be, significantly weakened as a result of the actions taken in response to the COVID-19 pandemic, and future government intervention remains uncertain. A weakened global economy may impact our players' purchasing decisions within our games, in particular given the limitations of redeeming real-world rewards due to government mandated or other restrictions on

travel and other activities and limitations on our players' discretionary spending, consumer activity during the pandemic and its impact on advertising investments, and the ability of our business partners, including our awards partners that provide the real-world rewards available in our games, to navigate this complex social, health and economic environment, any of which could result in disruption to our business and results of our operations.

The duration and extent of the impact from the COVID-19 pandemic depends on future developments that cannot be accurately predicted at this time, such as the severity and transmission rate of the virus, the existence of any additional waves of the COVID-19 pandemic, the impact of new COVID-19 variants, the extent and effectiveness of containment actions, progress towards widespread rapid testing, effective treatment alternatives and the adoption and efficacy of available vaccines, and the impact of these and other factors on our employees, players, and business partners. If we are not able to respond to and manage the impact of such events effectively, our business may be harmed. To the extent the COVID-19 pandemic adversely affects our business and financial results, it may also have the effect of heightening many of the other risks described herein.

Our industry is very competitive. If players prefer our competitors' games over our own, our operating results could suffer.

Competition in the gaming industry, especially the mobile gaming segment, is intense and subject to rapid changes, including changes from evolving player preferences and emerging technologies. Many new games are introduced in each major industry segment (mobile, web, PC, and console) each year, but only a relatively small number of titles account for a significant portion of total revenue in each segment. While we intend to diversify our product offering, we currently compete primarily in the social casino gaming category and our competitors that develop mobile and web games in the social casino gaming category vary in size and offerings and include companies such as Aristocrat, DoubleU, Huuuge Games, Playtika, SciPlay, Zynga, GSN Games, and others. In addition, there are competitors that develop mobile and web games that are not currently focused on the social casino gaming category but may move into that space and that may also impede our diversification efforts, including companies such as Activision Blizzard (the parent company of King Digital), Electronic Arts (EA Mobile), Epic Games, Jam City, Netmarble (the parent company of Kabam), NetEase (NetEase Games), Niantic, Take-Two Interactive Software, Vivendi (the parent company of Gameloft) and others. In addition, online game developers and distributors that are primarily focused on specific international markets, such as Giant Interactive and Tencent in Asia, and high-profile companies with significant online presences that to date have not actively focused on social games, such as Facebook, Apple, Google, Amazon, and Microsoft, may decide to develop social games including social casino games which may compete with our games. Some of these current and potential competitors have significant resources for developing or acquiring additional games, may be able to incorporate their own strong brands and assets into their games, have a more diversified set of revenue sources than we do and may be less severely affected by changes in player preferences, regulations, or other developments that may impact our industry.

There are relatively low barriers to entry to develop a mobile or online game and we expect new game competitors to enter the market and existing competitors to allocate more resources to develop and market competing games and applications. We also compete or will likely compete with a vast number of small companies and individuals who are able to create and launch games and other content for devices and platforms using relatively limited resources and with relatively limited start-up time or expertise. The proliferation of titles in these open developer channels makes it difficult for us to compete for players without substantially increasing our marketing expenses. We also face competition for the leisure time, attention, and discretionary spending of our players from other non-gaming activities, such as social media and messaging applications, personal computer and console games, video streaming services, television, movies, sports, and the Internet. Increasing competition could result in loss of players, increasing player acquisition and retention costs, and loss of talent, all of which could harm our business, financial condition, or results of operations.

We rely on a small portion of our total players for a substantial amount of our revenue and if we fail to grow our player base, or if player engagement declines, our revenue and operating results will be harmed.

Compared to all players who play our games in any period, only a small portion are paying players. In order to sustain and grow our revenue levels, we must attract, retain and increase the number of paying players or more effectively monetize our players through advertising and other strategies. To retain players, we must devote significant resources so that the games they play retain their interest and attract them to our other games. We might not succeed in our efforts to increase the monetization rates of our players, particularly if we are unable to retain our paying players. If we fail to grow or sustain the

number of our paying players, if the rates at which we attract and retain paying players declines, or if the average amount our players pay declines, our business may not grow and our financial results will suffer.

A substantial portion of our loyalty rewards are obtained from MGM, and any change in that relationship could materially and adversely affect our business and financial results.

Although we have a portfolio of entertainment, retail, technology, travel, leisure, and gaming brands across the globe providing rewards through our playAWARDS program, MGM has historically provided a substantial amount of such rewards and the majority of the rewards redeemed through our playAWARDS program for the year ended December 31, 2021 were offered by MGM. Under the terms of our marketing agreement and rewards agreement with MGM, MGM has discretion over the types and quantities of rewards and whether to make any rewards available for a particular game, and MGM may discontinue any rewards previously made available. The terms of our marketing agreement with MGM requires us to meet certain performance criteria for it to be automatically renewed, and if we fail to meet those performance criteria, MGM could terminate both the marketing agreement and the rewards agreement. If we fail to meet our required performance criteria under the marketing agreement, we could also lose certain intellectual property rights that we license from MGM under the marketing agreement and which we use as creative assets in our games. In the event that MGM offers fewer or less attractive rewards for our games or if we fail to achieve the required performance milestones and MGM decides not to renew our agreements, our business and financial results could be materially and adversely affected.

We rely on third-party platforms such as the Apple App Store, Google Play Store, Amazon Appstore, and Facebook to distribute our games and collect revenues generated on such platforms and rely on third-party payment service providers to collect revenues generated on our own platforms.

We derive a significant portion of our revenue from the distribution of our games on the Apple App Store, Google Play Store, Amazon Appstore, and Facebook, and the virtual items we sell in our games are purchased using the payment processing systems of these third-party platform providers. Additionally, we have historically acquired a significant number of our players through Facebook. If we are unable to maintain a good relationship with such platform providers, if their terms and conditions or pricing change to our detriment, if we violate, or if a platform provider believes that we have violated, the terms and conditions of its platform, or if any of these platforms loses market share or falls out of favor, or is unavailable for a prolonged period of time, our business will suffer.

We are subject to the standard and non-negotiated policies and terms of service/publisher agreements of third-party platforms, which govern the promotion, distribution, content, and operation generally of games on the platform. Each platform provider has broad discretion to unilaterally change and interpret its terms of service and other policies with respect to us and other developers, and those changes may be unfavorable to us. For example, in late 2019, a platform provider updated the rating on one of our games to Adults Only. While this issue has been resolved and the game is no longer rated Adults Only, the platform provider took longer to review and approve new releases for such game while it retained the Adults Only rating, which resulted in uncertainty around when releases would be approved, and resulted in delays in commercial releases that negatively impacted our ability to undertake planned marketing and promotional campaigns to feature the new releases. A platform provider may also change its fee structure, add fees associated with access to and use of its platform, alter how we are able to advertise on the platform, change how the personal information of its users is made available to application developers on the platform, limit the use of personal information for advertising purposes, or restrict how players can share information with their friends on the platform or across platforms. Our business could be harmed if:

- the platform providers discontinue or limit our access to their platforms;
- governments or private parties, such as internet providers, impose bandwidth restrictions, increase charges, or restrict or prohibit access to those platforms;
- the platforms increase the fees they charge us;
- the platforms modify their algorithms, communication channels available to developers, respective terms of service, or other policies;
- the platforms decline in popularity;
- the platforms adopt changes or updates to their technology that impede integration with other software systems or otherwise require us to modify our technology or update our games in order to ensure players can continue to access our games and content with ease;

- the platforms elect or are required to change how they label free-to-play games or take payment for in-game purchases;
- the platforms block or limit access to the genres of games that we provide in any jurisdiction;
- the platforms impose restrictions or spending caps or make it more difficult for players to make in- game purchases of virtual items;
- the platforms change how the personal information of players is made available to developers or develop or expand their own competitive offerings; or
- we are unable to comply with the platform providers' terms of service.

In addition, third-party platforms also impose certain file size limitations, which limits our ability to create software with additional features that would result in a larger size than the platform providers would support. Aside from these file size limitations, a larger game file size could cause players to delete our games once the file size grows beyond the capacity of their devices' storage limitations or could reduce the number of downloads of these games.

Changes in the respective terms of service or policy changes of third-party platforms may decrease the visibility or availability of our games, limit our distribution capabilities, prevent access to our existing games, reduce the amount of revenue we may recognize from in-game purchases, increase our costs to operate on these platforms, or result in the exclusion or limitation of our games on such platforms. Any such changes could adversely affect our business, financial condition, or results of operations.

If our platform providers do not perform their obligations in accordance with our platform agreements, we could be adversely impacted. For example, in the past, some of these platform providers have been unavailable for short periods of time, unexpectedly changed their terms or conditions or experienced issues with their features that permit our players to purchase virtual items. If any of our third-party service providers is unable to process payments, even for a short period of time, our business could be harmed. These platforms and our third-party online payment service providers may also experience security breaches or other issues with their functionalities. In addition, if we violate, or a platform provider believes we have violated, its terms of service, policies, or standard publisher agreements (or if there is any change or deterioration in our relationship with any of these platform providers), that platform provider could limit or discontinue our access to the platform or we may be exposed to liability or litigation. For example, in August 2020, Epic Games attempted to bypass Apple and Google's payment systems for in-game purchases with an update that allowed users to make purchases directly through Epic Games in their game, Fortnite. Apple and Google promptly removed Fortnite from their respective app stores. In August 2020, Epic Games filed separate lawsuits against Apple and Google relating to, among other things, the 30% platform fee and anti-trust violations. In September 2020, Apple filed a counterclaim seeking injunctive relief to block the use of Epic Games' payment system and seeking monetary damages to recover funds made while the updated version of Fortnite was active. In September 2021, a court ruled that Apple must provide other payment options for in-app game purchases within a certain time, however, Apple is not required to allow Fortnite back on its app store. Both parties have appealed the ruling. In October 2021, Google filed a counterclaim seeking monetary damages from Epic Games for breach of contract.

If any such events described above occur on a short-term or long-term basis, or if these third-party platforms and online payment service providers otherwise experience issues that impact the ability of players to download or access our games, access social features, or make in-game purchases, it could materially and adversely affect our brands and reputation, as well as our business, financial condition, and results of operations.

We rely on third-party hosting and cloud computing providers to operate certain aspects of our business. In particular, a significant portion of our game traffic is hosted by Amazon Web Services, or AWS, and any failure, disruption or significant interruption in our network or hosting and cloud services could adversely impact our operations and harm our business.

Our technology infrastructure is critical to the performance of our games, the satisfaction of our players, and our corporate functions. Our games and company systems run on a complex distributed system, or what is commonly known as cloud computing. We own, operate, and maintain elements of this system, but significant elements of this system are operated by third parties that we do not control and which would require significant time and expense to replace. We expect this dependence on third parties to continue. We have experienced, and may in the future experience, disruptions, outages, and other performance problems due to a variety of factors, including infrastructure changes, human or software errors, and capacity constraints. If any such interruption is significant or prolonged, if a particular game is unavailable when players

attempt to access it or navigation through a game is slower than they expect, players may stop playing the game and may be less likely to return to the game as often, if at all.

In addition, any changes in these third parties' service levels may adversely affect our ability to meet the requirements of our players. As our platform's continuing and uninterrupted performance is critical to our success, sustained or repeated system failures would reduce the attractiveness of our offerings. It may become increasingly difficult to maintain and improve our performance, especially during peak usage times, as we expand and the usage of our offerings increases. Any negative publicity arising from these interruptions, delays, outages, or other performance problems could adversely affect our business, financial condition, results of operations, or reputation. Furthermore, in the event that any of our agreements with these third-party providers are terminated, we may experience significant costs or downtime in connection with the transfer to, or the addition of, new hosting or cloud computing providers. Although alternative providers could host our platform on a substantially similar basis, such transition could potentially be disruptive and we could incur significant costs in connection with such transition.

In particular, a significant portion of our game traffic, data storage, data processing and other computing services and systems is hosted by AWS. AWS provides us with computing and storage capacity pursuant to an agreement that continues until terminated by either party. The agreement requires AWS to provide us their standard computing and storage capacity and related support in exchange for timely payment by us. Any disruptions, delays, outages and other performance problems caused by AWS could significantly impact our business due to our many services and systems relying on the AWS services.

We have engaged third-party game development companies to develop and operate new mobile games and if they fail to perform as expected, our business may suffer.

We currently, have in the past and expect in the future to, engage third-party game development companies to develop and operate new mobile games on our behalf. In each instance, we have been and in the future intend to be the publisher of these third-party developed games when they are available for distribution through platforms such as the Apple App Store, Google Play Store, and Amazon Appstore, but much of the responsibility to operate our games after commercial launch will be undertaken by the development company. Typically when we engage a third-party game development company, we will enter into a contract with them that defines their and our duties and responsibilities, but we have limited control over the work performed by the development company and are therefore subject to additional risks than if our own employees were developing our games, such that completion of our games and their publication could be delayed due to the development company's failure to adhere to our milestones and roadmaps. For example, one of our third-party game development companies has in the past, and may in the future, fail to complete development milestones in accordance with our game development roadmap. If our third-party game development companies do not perform in accordance with our agreements with them, it could adversely affect the development of our games that are the subject of that agreement, including delaying their availability for launch and their performance once launched, which could materially and adversely impact our ability to meet our forecasts.

Once a co-developed game is launched, we will be reliant on the development company's ability to maintain adequate knowledgeable and experienced personnel to operate and maintain the co-developed game successfully and to develop and implement future game updates, patches and bug fixes, as well as provide ongoing support services. If the development company fails to operate and maintain the co-developed game, it could adversely affect the co-developed game's performance and player satisfaction and our business may suffer as a result.

We do not own or have direct control of the source code of the third-party developed games, but we endeavor to have source code escrow agreements in place under which the source code and operation documentation of such co-developed games will be held in escrow. If the source code escrow release conditions are triggered under the applicable source code escrow agreement, while we may be able to obtain access to and use the source code and operation documentation to operate the relevant co-developed game, it would take significant time for our employees to learn how to manage the operation of the co-developed game or develop future game updates, patches, or bug fixes for the co-developed game, which could adversely affect the co-developed game's performance and player satisfaction, and our business may suffer as a result.

In addition, a co-developed game may incorporate intellectual property owned by the applicable development company. In such cases, we have or will obtain licenses to use the intellectual property as integrated with and into the co-developed game, but we will not own such intellectual property. If the third-party game developer challenged our right to use its intellectual property or the manner in which we use such intellectual property, it could materially and adversely affect our ability to continue to publish the co-developed game.

If we do not successfully invest in, establish and maintain awareness of our brands and games, if we incur excessive expenses promoting and maintaining our brands or our games or if our games contain defects, our business, financial condition, results of operations, or reputation could be harmed.

We believe that establishing and maintaining our brands is critical to maintaining and creating favorable relationships with players, awards partners, content licensors, and advertisers, as well as competing for key talent. Increasing awareness of our brands and recognition of our games is particularly important in connection with our strategic focus on developing games based on our own intellectual property and successfully cross-promoting our games. In addition, globalizing and extending our brands and recognition of our games requires significant investment and extensive management time to execute successfully. Although we make significant sales and marketing expenditures in connection with the launch of our games, these efforts may not succeed in increasing awareness of our brands or the new games. If we fail to increase and maintain brand awareness and consumer recognition of our games, our potential revenue could be limited, our costs could increase and our business, financial condition, results of operations, or reputation could suffer.

In addition, our games may contain errors, bugs, flaws, corrupted data, defects, and other vulnerabilities, some of which may only become apparent after their launch, particularly as we launch new games and rapidly release new features to existing games under tight time constraints. Furthermore, our development and testing processes may not detect errors and vulnerabilities in our games prior to their release. Any such errors, flaws, defects, and vulnerabilities may disrupt our operations, violate applicable security standards, adversely affect the game experience of our players, harm our reputation, cause our players to stop playing our games, divert our resources, and delay market acceptance of our games, any of which could result in harm to our business, financial condition, or results of operations.

We strive to establish and maintain our brands by obtaining trademark rights, including for our games. However, if our trademarks and trade names are not adequately protected, we may not be able to build name recognition in our markets of interest and our competitive position, business, financial condition, or results of operations may be harmed.

Our ability to acquire and maintain licenses to intellectual property may affect our revenue and profitability. Competition for these licenses may make them more expensive and increase our costs.

Much of the intellectual property we use in our games is created by us, but we also rely on licenses or rights we receive to third-party intellectual property for use in our games or platform to enhance the experience of our players or otherwise operate our business. For example, we use licensed intellectual property from certain parties such as MGM, Tetris, and Konami Gaming as creative assets in our games. These licenses typically limit our use of intellectual property to specific uses and for specific time periods, and include other contractual obligations, including the achievement of certain performance milestones with which we must comply in order for the license to remain in effect. Moreover, certain intellectual property rights may be licensed to us on a non-exclusive basis, and accordingly, the owners of such intellectual property are free to license such rights to third parties, including our competitors, on terms that may be superior to those offered to us, which could place us at a competitive disadvantage. Competition for these licenses is intense, and often results in one or more of increased advances, minimum payment guarantees, and royalties that we must pay to the licensor, which decreases our profitability. In the future, we may identify additional third-party intellectual property we may need or desire to license in order to engage in our business, including to develop or commercialize new games. However, such licenses may not be available on acceptable terms or at all. If we are unable to obtain and remain in compliance with the terms of these licenses or obtain additional licenses on reasonable economic terms, we may be required to discontinue or limit our use of our games or features therein that include or incorporate the licensed intellectual property, and our revenue and profitability may be adversely impacted.

We also cannot be certain that our licensors are not infringing, misappropriating, or otherwise violating the intellectual property rights of others or that our licensors have sufficient rights to the intellectual property to grant us the applicable licenses. If we are unable to obtain or maintain rights to any of such in-licensed intellectual property because of claims of intellectual property infringement, misappropriation, or other violation claims brought by third parties against our licensors or against us, our ability to develop games containing such intellectual property could be severely limited and our business could be harmed.

The perceived value of our virtual currency is highly dependent on how we manage the economies in our games. If we fail to manage our game economies properly, our business may suffer.

We derive substantially all of our revenues from the sale of virtual currency. Paying players purchase virtual currency in our games because of its perceived value, which is dependent on the relative ease of obtaining equivalent virtual currency by simply playing our games. The perceived value of our virtual currency can be impacted by various actions that we take in our

games, including offering discounts for virtual currency or giving away virtual currency in promotions. Managing game economies is difficult, and relies on our assumptions and judgment. If we fail to manage our virtual economies properly or fail to promptly and successfully respond to any such disruption, our reputation may suffer and our players may be less likely to play our games and to purchase virtual currency from us in the future, which would cause our business, financial condition, and results of operations to suffer.

If the use of mobile devices as game platforms and the proliferation of mobile devices generally do not increase, our business could be adversely affected.

The number of people using mobile Internet-enabled devices has increased dramatically over time and we expect that this trend will continue. However, the mobile market, particularly the market for mobile games, may not grow in the way we anticipate. Our future success is substantially dependent upon the continued growth of the market for mobile games. In addition, we do not currently offer our games on all mobile devices. If the mobile devices on which our games are available decline in popularity or become obsolete faster than anticipated, we could experience a decline in revenue and may not achieve the anticipated return on our development efforts. Any such declines in the growth of the mobile market or in the use of mobile devices for games could harm our business, financial condition, or results of operations.

We rely on information technology and other systems and platforms, and any failures, errors, defects, or disruptions in our or our vendors' or other partners' systems or platforms could diminish our brand and reputation, subject us to liability, disrupt our business, impact our games and related software applications, affect our ability to scale our technical infrastructure, and adversely affect our operating results and growth prospects.

Our technology infrastructure will be critical to the performance of our games and satisfaction of our players and to the general operation of our business. We devote significant resources to network and data security to protect our systems and data. However, our systems may not be adequately designed with the necessary reliability and redundancy to avoid performance delays or outages that could be harmful to our business. We cannot assure you that the measures we take to detect and prevent or hinder cyber-attacks or other security or data breaches, to protect our systems, data and player information, and to prevent outages, data loss, and fraud, including a disaster recovery strategy for server, equipment, or systems failure and the use of third parties for certain cybersecurity services, will provide sufficient security or be adequate for our operations. Our vendors and other partners are also subject to the foregoing risks, and we do not have any control over them. We have experienced and may in the future experience system disruptions, outages, and other performance problems, including when releasing new software versions or bug fixes, due to a variety of factors, including infrastructure changes, human or software errors, and capacity constraints. Such disruptions have not had a material impact to date, however, future disruptions from unauthorized access to, fraudulent manipulation of, or tampering with our or third parties' computer systems and technological infrastructure, including the data contained therein or transmitted thereby, could result in a wide range of negative outcomes, including violations of applicable privacy laws which can result in significant fines, governmental investigations and enforcement actions, legal and financial exposure, contractual liability, and damage to our reputation, each of which could materially adversely affect our business, financial condition, results of operations, and prospects.

Programming errors, defects, and data corruption could also disrupt our operations, cause us to violate applicable data privacy laws, adversely affect the experience of our players, harm our reputation, cause our players to stop playing our games, divert our resources, and delay market acceptance of our games, any of which could result in legal liability to us or harm our business, financial condition, results of operations, and prospects.

If our player base and engagement continue to grow, and the number and types of games we offer continue to grow and evolve, we will need an increasing amount of technical infrastructure, including network capacity and computing power, to continue to satisfy our players' needs and operate our business. Such infrastructure expansion may be complex, and unanticipated delays in completing these projects or availability of components may lead to increased project costs, operational inefficiencies, or interruptions in the delivery or degradation of the quality of our games or other operations. In addition, there may be issues related to this infrastructure that are not identified during the testing phases of design and implementation, which may only become evident after we have started to fully use the underlying equipment or software, that could further degrade the player experience or increase our costs. As such, we could fail to continue to effectively scale and grow our technical infrastructure to accommodate increased demands. In addition, our business may be subject to interruptions, delays or failures resulting from adverse weather conditions, other natural disasters, power loss, terrorism, cyber-attacks, public health emergencies (such as the COVID-19 pandemic), or other catastrophic events.

We believe that if our players have a negative experience with our games, or if our brand or reputation is negatively affected, players may be less inclined to continue or to engage with us. As such, a failure or significant interruption in our service would harm our reputation, business, and operating results.

While we have achieved profitability in the past, we also have a history of net losses and our revenue and operating margins may decline. We also may incur substantial net losses in the future and may not sustain profitability.

Our operating and net income has historically fluctuated and we believe our operating margin could decrease as a result of increasing costs resulting from the risks discussed in this Quarterly Report on Form 10-Q or in connection with any merger and acquisition activity that we may undertake. We expect to continue to expend substantial financial and other resources on game development, our technology stack, game engines, game technology and tools, player acquisition, the expansion of our network, international expansion, and marketing. Our operating costs will increase and our operating margins may decline if we do not effectively manage costs, launch new products on schedule that monetize successfully, and enhance our games so that these games continue to monetize successfully. In addition, weak economic conditions or other factors could cause our revenues to contract, requiring us to implement significant additional cost cutting measures, including a decrease in sales and marketing and paid player acquisition, which could harm our long-term prospects. If our revenue does not increase to offset any additional expenses, if we fail to manage or experience unexpected increases in operating expenses, or if we are required to take additional charges related to impairments or restructurings, our financial results and results of operations may suffer and we may not achieve or maintain profitability.

We intend to grow our business through strategic acquisitions, investments, and joint ventures that involve numerous risks and uncertainties.

We intend to grow our business through strategic acquisitions, investments, and joint ventures that involve numerous risks and uncertainties. We are currently in various stages of seeking, evaluating, and pursuing strategic acquisitions both in the U.S. and in non-U.S. jurisdictions, and we intend to continue to seek, evaluate, and pursue strategic transactions, investments, and joint ventures, both in the U.S. and in non-U.S. jurisdictions. These transactions often require unique approaches to integration due to, among other reasons, the structure of the transactions, the locations, and cultural differences among the other company's teams and ours, and have required and will continue to require significant attention from our management team. If we are unable to obtain the anticipated benefits from these transactions, or if we encounter difficulties in integrating any acquired operations with our business, our financial condition, and results of operations could be materially harmed.

Challenges and risks from such acquisitions, investments, and joint ventures include:

- our ability to identify, compete effectively for, or complete suitable acquisitions and investments at prices we consider attractive;
- our ability to estimate accurately the financial effect of acquisitions and investments on our business, our ability to estimate accurately any synergies or the impact on our results of operations of such acquisitions and investments;
- acquired products, technologies or capabilities, particularly with respect to any that are still in development when acquired, may not perform as expected, may have defects, or may not be integrated into our business as expected;
- acquired entities or joint ventures may not achieve expected business growth or operate profitably, which could adversely affect our results of operations, and we may be unable to recover investments in any such acquisitions or joint ventures;
- our assumption of legal or regulatory risks, particularly with respect to smaller businesses that have immature business processes and compliance programs, or litigation we may face with respect to the acquired company, including claims from terminated employees, players, former stockholders, or other third parties;
- negative effects on business initiatives and strategies from the changes and potential disruption that may follow the acquisition;
- diversion of our management's attention;
- declining employee morale and retention issues resulting from changes in compensation, or changes in management, reporting relationships, or future prospects;
- the need to integrate the operations, systems, technologies, products, and personnel of each acquired company, the inefficiencies and lack of control that may result if such integration is delayed or not implemented, and unforeseen difficulties and expenditures that may arise in connection with integration;

- the difficulty in determining the appropriate purchase price of acquired companies may lead to the overpayment of certain acquisitions and the potential impairment of intangible assets and goodwill acquired in the acquisitions;
- the difficulty in successfully evaluating and utilizing the acquired products, technology, or personnel;
- acquisitions, investments, and joint ventures may require us to spend a significant amount of cash, to incur debt, resulting in increased fixed payment obligations and could also result in covenants or other restrictions on us, or to issue capital stock, resulting in dilution of ownership of our stockholders;
- the need to implement controls, procedures, and policies appropriate for a larger, U.S.-based public company at companies that prior to acquisition may not have as robust controls, procedures, and policies, in particular, with respect to compliance with privacy and other regulations protecting the rights of users, and compliance with U.S.-based economic policies and sanctions which may not have previously been applicable to the acquired company's operations;
- the difficulty in accurately forecasting and accounting for the financial impact of an acquisition transaction, including accounting charges and integrating and reporting results for acquired companies that have not historically followed U.S. GAAP;
- the fact that we may be required to pay contingent consideration in excess of the initial fair value, and contingent consideration may become payable at a time when we do not have sufficient cash available to pay such consideration;
- the fees and costs of legal, accounting, and other professional advisors engaged by us for such acquisitions, which may be substantial;
- under purchase accounting, we may be required to write off deferred revenue which may impair our ability to recognize revenue that would have otherwise been recognizable which may impact our financial performance or that of the acquired company;
- risks associated with our expansion into new international markets and doing business internationally, including those described under the caption "*Our international operations are, and our strategy to expand internationally will be, subject to increased challenges and risks*";
- in the case of foreign acquisitions, the need to integrate operations across different cultures and languages and to address the particular economic, currency, political, and regulatory risks associated with specific countries;
- the potential loss of, or harm to, our relationships with employees, players, awards partners, content licensors, and other suppliers as a result of integration of new businesses;
- our dependence on the accuracy and completeness of statements and disclosures made or actions taken by the companies we acquire or their representatives, when conducting due diligence and evaluating the results of such due diligence;
- liability for activities of the acquired company before the acquisition, including intellectual property and other litigation claims or disputes, cyber and information security vulnerabilities, violations of laws, rules, and regulations, commercial disputes, tax liabilities, and other known and unknown liabilities; and
- we may not be able to effectively influence the operations of our joint ventures, or we may be exposed to certain liabilities if our joint venture partners do not fulfill their obligations.

The benefits of an acquisition, investment, or joint venture may also take considerable time to develop, and we cannot be certain that any particular transaction will produce the intended benefits, which could adversely affect our business, financial condition, or results of operations. Our ability to grow through future acquisitions, investments, and joint ventures will depend on the availability of suitable candidates at an acceptable cost, our ability to compete effectively to attract these candidates, and the availability of financing to complete larger transactions. In addition, depending upon the duration and extent of shelter-in-place, travel and other business restrictions adopted by us and imposed by various governments in response to the COVID-19 pandemic, including variants thereof, we have and will continue to encounter new challenges in evaluating future acquisitions, investments, and joint ventures and integrating personnel, business practices, and company cultures from acquired companies. Acquisitions, investments, and joint ventures could result in potential dilutive issuances of equity securities, use of significant cash balances or incurrence of debt (and increased interest expense), contingent liabilities

or amortization expenses related to intangible assets, or write-offs of goodwill or intangible assets, which could adversely affect our results of operations and dilute the economic and voting rights of our stockholders.

In addition, if we divest any businesses, these divestitures would similarly require significant investment of time and resources, may disrupt our business, distract management from other responsibilities, and may result in losses on disposal or continued financial involvement in the divested businesses, including through indemnification, guarantee, or other financial arrangements, for a period of time following the divestitures, which could adversely affect our financial results.

Our international operations are, and our strategy to expand internationally will be, subject to increased challenges and risks.

Continuing to expand our business to attract players in countries outside of the U.S. is an important element of our business strategy. An important part of targeting international markets is developing offerings that are localized and customized for the players in those markets. While we have international game studios in Hong Kong, Israel, Serbia, and Vietnam, we expect to continue to expand our international operations in the future by opening new international game studio locations and expanding our offerings in new languages. Our ability to expand our business and to attract players and talented employees in other international markets we may enter will require considerable management attention and resources and is subject to the particular challenges of supporting a rapidly growing business in an environment of multiple languages, cultures, customs, economics, legal systems, alternative dispute systems, regulatory systems, and commercial infrastructures.

Expanding our international focus may subject us to risks that we have not faced before or increase risks that we currently face, including risks associated with:

- inability to offer certain games in certain foreign countries;
- recruiting and retaining talented and capable management and employees in foreign countries;
- challenges caused by distance, language, and cultural differences;
- developing and customizing games and other offerings that appeal to the tastes and preferences of players in international markets;
- competition from local game makers with intellectual property rights and significant market share in those markets and with a better understanding of player preferences;
- obtaining, utilizing, protecting, defending, and enforcing our intellectual property rights;
- negotiating agreements with local distribution platforms that are sufficiently economically beneficial to us and protective of our rights;
- the inability to extend proprietary rights in our brand, content, or technology into new jurisdictions;
- implementing alternative payment methods for virtual currency in a manner that complies with local laws and practices and protects us from fraud;
- compliance with applicable foreign laws and regulations, including privacy laws and laws relating to content and consumer protection;
- compliance with anti-bribery laws, including the Foreign Corrupt Practices Act;
- credit risk and higher levels of payment fraud;
- currency exchange rate fluctuations;
- protectionist laws and business practices that favor local businesses in some countries;
- double taxation of our international earnings and potentially adverse tax consequences due to changes in the tax laws of the U.S. or the foreign jurisdictions in which we operate;
- political, economic, and social instability;
- public health crises, such as the COVID-19 pandemic and variants thereof, which can result in varying impacts to our employees, players, vendors, and commercial partners internationally;

- higher costs associated with doing business internationally;
- export or import regulations; and
- trade and tariff restrictions.

If we are unable to manage the complexity of our global operations successfully, our business, financial condition, and operating results could be adversely affected. Additionally, our ability to successfully gain market acceptance in any particular market is uncertain, and the distraction of our senior management team could harm our business, financial condition, or results of operations.

Our business is subject to a variety of U.S. and foreign laws, many of which are unsettled and still developing and which could subject us to claims or otherwise harm our business.

We are subject to a variety of laws in the U.S. and abroad that affect our business, including state and federal laws regarding consumer protection, electronic marketing, data protection and privacy, competition, taxation, intellectual property, export, and national security, which are continuously evolving and developing. The scope and interpretation of the laws that are or may be applicable to us are often uncertain and may be conflicting, particularly laws outside the U.S. There is a risk that existing or future laws may be interpreted in a manner that is not consistent with our current practices and could have an adverse effect on our business. It is also likely that as our business grows and evolves and our games are played in a greater number of countries, we will become subject to laws and regulations in additional jurisdictions or other jurisdictions may claim that we are required to comply with their laws and regulations.

There are ongoing academic, political, and regulatory discussions in the U.S., Europe, Australia, and other jurisdictions regarding whether social casino applications should be subject to a higher level or different type of regulation than other social game applications to protect consumers, in particular minors and persons susceptible to addiction to social casino games, and, if so, what this regulation should include. For example, at the end of August 2020, a court approved a settlement of class action litigation relating to violations by Big Fish Games, Inc., the operator of an online social casino game, of a specific anti-gambling law in the State of Washington, in an aggregate amount equal to \$155.0 million. While our games operate differently from games implicated in the Big Fish Games class action litigation, if new social casino regulations are imposed, or other regulations are interpreted to apply to our social casino games, certain, or all, of our casino-themed games may become subject to the rules and regulations and expose us to civil and criminal penalties if we do not comply. In addition, the increased attention focused upon liability issues as a result of lawsuits and legislative proposals could harm our reputation or otherwise impact the growth of our business. Any costs incurred as a result of this potential liability could harm our business, financial condition, or results of operations.

It is possible that a number of laws and regulations may be adopted or construed to apply to us in the U.S. and elsewhere that could restrict the online and mobile industries, including player privacy, advertising, taxation, content suitability, copyright, distribution, and antitrust. Furthermore, the growth and development of electronic commerce may prompt calls for more stringent consumer protection laws that may impose additional burdens on companies such as ours conducting business through the Internet and mobile devices. We anticipate that scrutiny and regulation of our industry will increase and we will be required to devote legal and other resources to addressing such regulation. For example, existing laws or new laws regarding the marketing of in-game purchases, labeling of free-to-play games, regulation of currency, banking institutions, unclaimed property, or money transmission may be interpreted to cover our games and the virtual currency, goods, or payments that we receive. If that were to occur, we may be required to seek licenses, authorizations, or approvals from relevant regulators, the granting of which may be dependent on us meeting certain capital and other requirements and we may be subject to additional regulation and oversight, all of which could significantly increase our operating costs. Changes in current laws or regulations or the imposition of new laws and regulations in the U.S. or elsewhere regarding these activities may lessen the growth of social game services and impair our business, financial condition, or results of operations.

We may be subject to future litigation in the operation of our business. An adverse outcome in one or more proceedings could adversely affect our business.

We may be involved in claims, suits, government investigations, and proceedings arising in the ordinary course of our business, including actions with respect to intellectual property claims, privacy, data protection, law enforcement matters, tax matters, labor and employment claims, commercial and acquisition-related claims, class action lawsuits, and other matters. Such claims, suits, government investigations, and proceedings are inherently uncertain and their results cannot be predicted with certainty. Regardless of their outcomes, such legal proceedings can have an adverse impact on us because of legal costs, diversion of management and other personnel, and other factors. It is possible that a resolution of one or more such proceedings could result in liability, penalties, or sanctions, as well as judgments, consent decrees, or orders preventing us

from offering certain features, functionalities, products, or services, or requiring a change in our business practices, products or technologies, which could in the future materially and adversely affect our business, financial condition, or results of operations.

Failure to obtain, maintain, protect, or enforce our intellectual property rights could harm our business, results of operations, and financial condition.

We regard the protection of our trade secrets, software, trademarks, service marks, trade dress, domain names, patents, and other intellectual property rights as critical to our success. We strive to protect our intellectual property rights by relying on a combination of federal, state, and common law trademark, copyright, patent, and trade secret protection laws, as well as contractual restrictions and business practices. We enter into proprietary information and invention assignment agreements with our employees and contractors and confidentiality agreements with parties with whom we conduct business in order to limit access to, and disclosure and use of, our proprietary information. While these agreements will give us contractual remedies upon any unauthorized use or disclosure of our proprietary business information or intellectual property, we may not always be able to effectively monitor or prevent such unauthorized use or disclosure or misappropriation of our proprietary information or intellectual property or deter independent development of similar technologies by others. Enforcing a claim that a party illegally disclosed or misappropriated our proprietary information is difficult, expensive, and time-consuming, and the outcome is unpredictable, and therefore, we may not be able to obtain adequate remedies. In addition, some courts inside and outside the U.S. are less willing or unwilling to protect trade secrets. If any of our trade secrets were to be lawfully obtained or independently developed by a competitor or other third party, we would have no right to prevent them from using that technology or information to compete with us, which could harm our competitive position, business, financial condition, results of operations, and prospects.

We own registered trademarks and issued patents, and have filed, and may continue in the future to file, trademark and patent applications to protect certain of our innovations and intellectual property. This process can be expensive and time-consuming, may not always be successful depending on the intellectual property laws of the applicable jurisdiction in which we seek protection or other circumstances, in which case we may be unable to secure intellectual property protection for all of our technology and methodologies. We also may choose not to pursue registrations in every jurisdiction depending on the nature of the project to which the intellectual property rights pertain. We may, over time, increase our investments in protecting our innovations and other technology. Even if we are successful in obtaining effective intellectual property protection, it is expensive to maintain these rights and the costs of defending our rights could be substantial. Moreover, our failure to develop and properly manage new innovations and other technology could hurt our market position and business opportunities.

While our software and other proprietary technology may be protected under copyright law, we have chosen not to register any copyrights in these works, and instead, primarily rely on protecting our software as a trade secret. In order to bring a copyright infringement lawsuit in the U.S., the applicable copyright must be registered. Accordingly, the remedies and damages available to us for unauthorized use of our software may be limited.

Furthermore, our intellectual property and other proprietary rights may be challenged, knowingly or unknowingly infringed, misappropriated circumvented, declared generic, or determined to be infringing on or dilutive of third-party intellectual property rights, and we may not be able to prevent infringement or misappropriation or other violation of our intellectual property and other proprietary rights without incurring substantial expense. Litigation may be necessary to enforce our intellectual property rights, protect our trade secrets, or determine the validity and scope of proprietary rights claimed by others. Monitoring unauthorized use of our intellectual property is difficult and costly, and while it is our policy to protect and defend our rights to our intellectual property, we cannot predict whether steps taken by us to enforce and protect our intellectual property rights will be adequate to prevent infringement, misappropriation, dilution, or other violations of our intellectual property rights. Any inability to meaningfully enforce our intellectual property rights could harm our ability to compete and reduce demand for our games. Moreover, in any lawsuit we bring to enforce our intellectual property rights, a court may refuse to stop the other party from using the technology at issue on grounds that our intellectual property rights do not cover the technology in question. Further, in such proceedings, the defendant could counterclaim that our intellectual property is invalid or unenforceable and the court may agree, in which case we could lose valuable intellectual property rights. Any litigation of this nature, regardless of outcome or merit, could result in substantial costs, adverse publicity, and diversion of management and technical resources, any of which could adversely affect our business, financial condition, or results of operations. If we fail to maintain, protect, and enhance our intellectual property rights, our business, financial condition, or results of operations may be harmed.

We may be subject to intellectual property disputes, which are costly to defend and could require us to pay significant damages and could limit our ability to use certain technologies in the future.

Our commercial success depends in part on our ability to operate without infringing, misappropriating, or otherwise violating the intellectual property rights of others. We have faced, and may in the future face, allegations that we have infringed, misappropriated, or otherwise violated the trademarks, copyrights, patents, and other intellectual property rights of third parties, including from our competitors and non-practicing entities. We may also be subject to claims that our employees, consultants, or other advisors have wrongfully used or disclosed alleged trade secrets of their former employers or claims asserting ownership of what we regard as our intellectual property. Intellectual property litigation may be protracted and expensive, and the results are difficult to predict. As the result of any court judgment or settlement, we may be obligated to cancel the launch of a new game, stop offering a game or certain features of a game in a particular geographic region or worldwide, pay significant royalties, settlement costs, or damages (including treble damages and attorneys' fees if we are found to have willfully infringed intellectual property rights), obtain licenses (which may not be available on acceptable terms or at all), modify our games and features, or develop substitutes. Even if we were able to obtain a license, it could be non-exclusive, thereby giving our competitors and other third parties access to the same technologies licensed to us. Furthermore, even if intellectual property disputes do not result in litigation, the time and resources necessary to resolve them could harm our business, results of operations, financial condition, and reputation.

Our games utilize third-party open source software components, which may pose particular risks to our proprietary software, technologies, and games in a manner that could negatively affect our business.

We use open source software in our game development and expect to continue to use open source software in the future. Use and distribution of open source software may entail greater risks than use of third-party commercial software, as open source licensors generally do not provide support, warranties, indemnification, or other contractual protections regarding infringement claims or the quality of the open source software code. To the extent that our games depend upon the successful operation of open source software, any undetected errors or defects in this open source software could prevent the deployment or impair the functionality of our games, delay new releases, result in a failure of our games, and injure our reputation. For example, undetected errors or defects in open source software could render it vulnerable to breaches or security attacks, and, as a result, make our systems more vulnerable to data breaches. In addition, the public availability of such software may make it easier for others to compromise our platform and games.

Moreover, some open source software licenses require users who distribute open source software as part of their proprietary software to publicly disclose all or part of the source code to such software or make available any derivative works or modifications of the open source code on unfavorable terms or at no cost. If we combine our proprietary software with open source software in a certain manner, we could, under certain open source licenses, be required to release or license the source code of our proprietary software to the public, and from time to time, we may face claims from third parties that incorporate open source software into their products, claiming ownership of, or demanding release of, the source code of the open source software or derivative works that were developed using such software, or otherwise seeking to enforce the terms of the applicable open source license. The terms of various open source licenses have not been interpreted by courts, and there is a risk that such licenses could be construed in a manner that imposes unanticipated conditions or restrictions on our use of the open source software. We monitor our use of open source software and try to use open source software in a manner that will not require the disclosure of the source code to our proprietary software or prevent us from charging fees to our players for use of our proprietary software. However, we cannot guarantee that these efforts will be successful, and thus there is a risk that the use of such open source software may ultimately result in litigation, preclude us from charging fees for the use of certain of our proprietary software, require us to replace certain code used in our games, pay damages, settlement fees or a royalty to use some open source software, make the source code of our games publicly available, or discontinue certain games. Any of the foregoing would have a negative effect on our business, financial condition, or results of operations.

We are subject to laws and regulations concerning data privacy, information security, data protection, and consumer protection, and these laws and regulations are continually evolving. Our actual or perceived failure to comply with these laws and regulations could harm our business.

We receive, store, and process personal information and other data relating to employees and business contacts, in addition to that of our players, and we enable our players to share their personal information with each other and with third parties, including on the Internet and mobile platforms. There are numerous federal, state, and local laws around the world regarding privacy and the storing, sharing, use, processing, disclosure, and protection of personal information, the scopes of

which are changing, subject to differing interpretations, and may be inconsistent between jurisdictions or conflict with other rules.

Various government and consumer agencies have called for new regulation and changes in industry practices and are continuing to review the need for greater regulation for the collection of information concerning consumer behavior on the Internet, including regulation aimed at restricting certain targeted advertising practices.

In the U.S., there are numerous federal and state privacy and data protection laws and regulations governing the collection, use, disclosure, protection and other processing of personal information, including federal and state data privacy laws, data breach notification laws, and consumer protection laws. For example, the California Consumer Privacy Act of 2018, or CCPA, came into force in January 2020 and created new privacy rights for consumers residing in the state of California. The CCPA gives California residents expanded rights to access and delete their personal information, opt out of certain personal information sharing, and receive detailed information about how their personal information is used. The CCPA allows for the California Attorney General to impose civil penalties for violations and also provides a private right of action for certain data breaches. California voters also recently passed the California Privacy Rights Act, or CPRA, which will take effect on January 1, 2023. The CPRA significantly modifies the CCPA, including by imposing additional obligations on covered companies and expanding California consumers' rights with respect to certain sensitive personal information, potentially resulting in further uncertainty and requiring us to incur additional costs and expenses in an effort to comply.

In the European Economic Area, or EEA, we are subject to the European Union's General Data Protection Regulation, or GDPR, which became effective in May 2018, and from January 1, 2021, we are also subject to the UK GDPR and UK Data Protection Act 2018, which retains the GDPR in UK national law. The GDPR and national implementing legislation in EEA member states and the UK impose a strict data protection compliance regime in relation to our collection, control, processing, sharing, disclosure, and other use of personal data, including providing detailed disclosures about how personal data is collected and processed, granting new rights for data subjects to access, delete, or object to the processing of their data, mandatory breach notification to supervisory authorities (and in certain cases, affected individuals) of certain data breaches, and significant documentary requirements to demonstrate compliance through policies, procedures, training, and audit. In particular, European Union privacy supervisory authorities have focused on compliance with requirements relating to the processing of children's personal data and ensuring that services offered to children are age appropriate, and we may be subject to regulatory scrutiny and subsequent enforcement actions if we are found to be processing children's data given the nature of our services.

We are also subject to European Union rules with respect to cross-border transfers of personal data out of the EEA and the UK. Recent legal developments in Europe have created complexity and uncertainty regarding transfers of personal data from the EEA and the UK to the U.S. Most recently, on July 16, 2020, the Court of Justice of the European Union, or CJEU, invalidated the EU-US Privacy Shield Framework, or Privacy Shield, under which personal data could be transferred from the EEA to U.S. entities, such as ourselves, who had self-certified under the Privacy Shield scheme. While the CJEU upheld the adequacy of the standard contractual clauses (a standard form of contract approved by the European Commission as an adequate personal data transfer mechanism, and potential alternative to the Privacy Shield), it made clear that reliance on them alone may not necessarily be sufficient in all circumstances.

These recent developments will require us to review and amend the legal mechanisms by which we make and/or receive personal data transfers to in the U.S. As supervisory authorities issue further guidance on personal data export mechanisms, including circumstances where the standard contractual clauses and other mechanisms cannot be used, and/or start taking enforcement action, we could suffer additional costs, complaints, and regulatory investigations or fines, or if we are otherwise unable to transfer personal data between and among countries and regions in which we operate, it could affect the manner in which we provide our services, the geographical location or segregation of our relevant systems and operations, and could adversely affect our financial results.

In addition, Brazil's passage of the Lei Geral de Protecao de Dados Pessoais, or LGPD, became effective September 2020 and created new privacy rights for consumers residing in Brazil.

Compliance with the GDPR, LGPD, CCPA, and similar legal requirements has required us to devote significant operational resources and incur significant expenses. We expect the number of jurisdictions adopting their own data privacy laws to increase, which will require us to devote additional significant operational resources and incur additional significant expenses and will also increase our exposure to risks of claims by our players that we have not complied with all applicable data privacy laws.

All of our games are subject to our online privacy policy and our terms of service accessible through our platform providers' storefronts, from our games, and on our corporate website. While we strive to comply with such policies and all applicable laws, regulations, other legal and contractual obligations, and certain industry standards and codes of conduct relating to data privacy and data protection, these obligations may be interpreted and applied in a manner that is inconsistent from one jurisdiction to another and may conflict with other rules or our practices. It is also possible that new laws, regulations, other legal obligations or industry codes of conduct may be adopted, or existing laws, regulations, other legal obligations or industry codes of conduct may be interpreted in such a way that results in us having to take further compliance steps and/or could prevent us from being able to offer services to citizens of a certain jurisdiction or makes it costlier or more difficult for us to do so.

Any failure or perceived failure by us to comply with our privacy policy and terms of service, or our data privacy-related legal obligations including those to our players or other third parties, or any compromise of security that results in the unauthorized release or transfer of personal information, including personal information about our players, may result in regulatory investigations, governmental enforcement actions, and significant fines, which, as an example, can be up to 20 million euros or up to 4% of the annual global revenue of the noncompliant undertaking, whichever is greater, for violations of certain requirements of the GDPR. The UK GDPR mirrors the fines under the GDPR. In addition to the foregoing, we may suffer reputational damage, orders to cease or change our processing of our data, civil claims including representative actions and other class action type litigation (where individuals have suffered harm), potentially amounting to significant compensation or damages liabilities, or public statements against us by consumer advocacy groups or others which could cause our players to lose trust in us, any of which could have an adverse effect on our business, financial condition, or results of operations. Additionally, if third parties we work with such as our players or vendors violate applicable laws or our policies, such violations may also put personal information at risk and expose us to potential liability and reputational harm. Further, public scrutiny of, or complaints about, technology companies or their data handling or data protection practices, even if unrelated to our business, industry, or operations, may lead to increased scrutiny of technology companies, including us, and may cause government agencies to enact additional regulatory requirements, or to modify their enforcement or investigation activities. Any of the foregoing could have an adverse effect on our business, financial condition, or results of operations.

Our business depends on our ability to collect and use data to deliver relevant content and marketing materials, and any limitation on the collection and use of this data could cause us to lose revenue.

When our players use our games, we may collect both personal and non-personal data about our players. We use some of this data to provide a better experience for our players by delivering relevant content and marketing materials. Our players may decide not to allow us to collect some or all of this data or may limit our use of this data. Any limitation on our ability to collect data about our players and game interactions would likely make it more difficult for us to deliver targeted content and marketing materials to our players. Interruptions, failures or defects in our data collection, analysis and storage systems, as well as privacy concerns, increasing public scrutiny and regulatory restrictions regarding the collection of data, could also limit our ability to aggregate and analyze player data. If that happens, we may not be able to successfully adapt to player preferences to improve and enhance our games, retain existing players, and maintain the popularity of our games, which could cause our business, financial condition, or results of operations to suffer.

We are also subject to evolving EU and UK privacy laws on cookies and similar technologies and eMarketing. In the EU and the UK, regulators are increasingly focusing on compliance with requirements in the online behavioral advertising ecosystem, and current national laws that implement the ePrivacy Directive are highly likely to be replaced by an EU regulation known as the ePrivacy Regulation which will significantly increase fines for non-compliance. In the EU and the UK, informed consent is required for the placement of a cookie or similar technologies on a user's device and for direct electronic marketing. The GDPR also imposes conditions on obtaining valid consent, such as a prohibition on pre-checked consents and a requirement to ensure separate consents are sought for each type of cookie or similar technology. While the text of the ePrivacy Regulation is still under development, a recent European court decision and regulators' recent guidance are driving increased attention to cookies and tracking technologies. If regulators start to enforce the strict approach endorsed in recent guidance, this could lead to substantial costs, require significant systems changes, limit the effectiveness of our marketing activities, divert the attention of our technology personnel, adversely affect our margins, increase costs, and subject us to additional liabilities. Regulation of cookies and similar technologies, and any decline in the use of cookies or similar online tracking technologies as a means to identify and potentially target players, may lead to broader restrictions and impairments on our marketing and personalization activities and may negatively impact our efforts to understand our players.

Additionally, Internet-connected devices and operating systems controlled by third parties increasingly contain features that allow device users to disable functionality that allows for the delivery of advertising on their devices, including through

Apple's Identifier for Advertising, or IDFA, or Google's Advertising ID, or AAID, for Android devices. Device and browser manufacturers may include or expand these features as part of their standard device specifications. Advertising identifiers are frequently used as a means to deliver targeted advertising to devices. While we currently conduct very limited advertising to our players in our games (often referred to as "ad monetization"), it is a meaningful way to generate revenue for many mobile game companies. If we subsequently increase our engagement in ad monetization to generate revenue, we will be limited in how and to whom we can present with in-game advertising, which could adversely affect our ability to generate revenues from advertising.

We rely on assumptions and estimates to calculate certain of our key metrics, and real or perceived inaccuracies in such metrics may harm our reputation and negatively affect our business.

Certain of our key metrics, including Daily Active Users, or DAU, Monthly Active Users, or MAU, Average Daily Revenue per DAU, or ARPDAU, Daily Paying Users, or DPU, and Daily Payer Conversion, are calculated using data tracked by our internal analytics systems based on tracking activity of player accounts. The analytics systems and the resulting data have not been independently verified. While these numbers are based on what we believe to be reasonable calculations for the applicable period of measurement, there are inherent challenges in measuring usage and player engagement across our player base and our recently acquired operations, and factors relating to player activity and systems may impact these numbers.

Our awards partners, content licensors, advertisers, and investors rely on our key metrics as a representation of our performance. We regularly review and may adjust our processes for calculating our internal metrics to improve their accuracy. If we determine that we can no longer calculate any of our key metrics with a sufficient degree of accuracy, and we cannot find an adequate replacement for the metric, our business, financial condition, or results of operations may be harmed. In addition, if awards partners, content licensors, advertisers or investors do not perceive our player metrics to be accurate representations of our user base or player engagement, or if we discover material inaccuracies in our user metrics, our reputation may be harmed and awards partners, content licensors, or advertisers may be less willing to allocate their resources, intellectual property, or budgets to our games, which could negatively affect our business, financial condition, or results of operations.

Companies and governmental agencies may restrict access to platforms, our website, mobile applications, or the Internet generally, which could lead to the loss or slower growth of our player base.

Our players generally need to access the Internet and, in particular, platforms such as Facebook, Apple, Google, and our website to play our games. Access to the Internet in a timely fashion is necessary to provide a satisfactory player experience to the players of our games. Companies and governmental agencies could block access to any platform, our website, mobile applications, or the Internet generally, or could limit the speed of data transmissions, for a number of reasons such as security or confidentiality concerns or regulatory reasons, or they may adopt policies that prohibit employees from accessing Facebook, Apple, Google, and our website or any other social platform. In addition, telecommunications companies may implement certain measures, such as increased cost or restrictions based on the type or amount of data transmitted, that would impact players' ability to access our games. If companies or governmental entities block or limit such access or otherwise adopt policies restricting players from playing our games, our business could be negatively impacted and could lead to the loss or slower growth of our player base.

Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance, or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure, or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, regulatory penalties, disruption of our operations and the services we provide to players, damage to our reputation, and a loss of confidence in our products and services, which could adversely affect our business.

Cybersecurity attacks, including breaches, computer malware and ransomware, computer hacking, and insider threats have become more prevalent in our industry, and experts have warned that the global disruption related to the COVID-19 pandemic and remote working conditions may result in increased threats and malicious activity. Any cybersecurity breach caused by hacking, which involves efforts to gain unauthorized access to information or systems, or to cause intentional malfunctions, loss or corruption of data, software, hardware, or other computer equipment, or the inadvertent transmission of computer viruses or other unauthorized access to our systems caused by employee error, malfeasance, or other disruptions could adversely affect our business, financial condition, results of operations, or reputation. We have experienced and will continue to experience hacking attacks of varying degrees from time to time. Because of our prominence in the social casino gaming industry, we believe we are a particularly attractive target for hackers. Additionally, rapidly evolving technology and

capabilities, evolving changes in the sources, capabilities and targets for cybersecurity attacks, as well as the increasing sophistication of cyber criminals increase the risk of material data compromise or business disruption.

In addition, we store sensitive information, including personal information about our employees, and our games involve the storage and transmission of players' personal information on equipment, networks, and corporate systems run by us or managed by third-parties including Amazon, Apple, Facebook, Google, and Microsoft. We are subject to a number of laws, rules, and regulations requiring us to provide notification to players, investors, regulators, and other affected parties in the event of a security breach of certain personal data, or requiring the adoption of minimum information security standards that are often vaguely defined and difficult to practically implement. The costs of compliance with these laws and regulations, including the GDPR and the CCPA, have increased and may increase in the future. Our corporate systems, third-party systems, and security measures have been subject to a breach and may be breached in the future due to the actions of outside parties, employee error, malfeasance, a combination of these, or otherwise, and, as a result, an unauthorized party may obtain access to, or compromise the integrity of, our data, our employees' data, our players' data, or any third-party data we may possess. Any such data security breach could require us to comply with various breach notification laws, create significant exposure for us, including under applicable data privacy laws and regulations such as the GDPR and CCPA, in particular if we have failed to take appropriate security measures, may affect our ability to operate, and may expose us to litigation, remediation and investigation costs, increased costs for security measures, loss of revenue, damage to our reputation and potential liability, each of which could be material.

Changes in tax laws or tax rulings could materially affect our effective tax rates, financial position, and results of operations.

The tax regimes we are subject to or operate under are unsettled and may be subject to significant change. Changes in tax laws (including in response to the COVID-19 pandemic) or changes in interpretations of existing laws could cause us to be subject to additional income-based taxes and non-income based taxes (such as payroll, sales, use, value-added, digital services, excise, net worth, property, and goods and services taxes), which in turn could materially affect our financial position and results of operations. For example, in December 2017, the U.S. federal government enacted the Tax Cuts and Jobs Act, or the 2017 Tax Act. The 2017 Tax Act significantly changed the existing U.S. corporate income tax laws by, among other things, lowering the corporate tax rate, implementing a partially territorial tax system, and imposing a onetime deemed repatriation toll tax on cumulative undistributed foreign earnings. Many of the provisions of the 2017 Tax Act are highly complex and may be subject to further interpretive guidance from the Internal Revenue Service, or IRS, or others. Some of the provisions of the 2017 Tax Act may be changed by a future Congress and may face future challenges by the World Trade Organization, or WTO, such as the favorable tax treatment for foreign-derived intangible income claimed by us. Although we cannot predict the nature or outcome of such future interpretive guidance, or actions by a future Congress or WTO, they could adversely impact the consolidated results of our operations and financial position. In addition, many countries in the EU, as well as a number of other countries and organizations such as the Organization for Economic Cooperation and Development, have recently proposed or recommended changes to existing tax laws or have enacted new laws that could impact our tax obligations. Any significant changes to our future effective tax rate may materially and adversely affect our business, financial condition, results of operations, or cash flows.

We could be required to collect additional sales, value-added, or similar taxes or be subject to other tax liabilities that may increase the costs of our players to engage with our games and adversely affect our results of operations.

One or more U.S. states or countries may seek to impose incremental or new sales, value-added, use, or other tax collection obligations on us. While we generally are not responsible for taxes generated on games accessed and operated through third-party platforms, we are responsible for collecting and remitting applicable sales, value-added, or other similar taxes for revenue generated on games accessed and operated on our own platforms. Historically, we paid taxes on revenue generated from games accessed on our own platforms in U.S. states where we had a sufficient physical presence or "nexus" based on the location of our U.S. offices and servers. However, there is uncertainty as to what constitutes sufficient physical presence or nexus for a U.S. state to levy taxes, fees, and surcharges for sales made over the Internet. Furthermore, an increasing number of states have considered or adopted laws that impose sales tax collection obligations on out-of-state companies. This is also the case in respect of the EU, where value-added taxes may be imposed on non-EU companies making digital sales to consumers within the EU. In addition, the U.S. Supreme Court ruled in *South Dakota v. Wayfair, Inc.*, or *Wayfair*, that online sellers can be required to collect sales and use tax despite not having a physical presence in the customer's state. In response to *Wayfair*, or otherwise, state and local governments may adopt, or begin to enforce, laws requiring us to calculate, collect, and remit sales taxes in their jurisdictions. Similarly, many foreign jurisdictions have considered or adopted laws that impose value-added, digital services, or similar indirect taxes on companies despite not having a physical presence in the foreign jurisdiction.

A successful assertion by one or more states, or other countries or jurisdictions, requiring us to collect taxes where we presently do not do so, or to collect more taxes in a jurisdiction in which we currently collect some taxes, could result in substantial liabilities, including taxes on past sales as well as penalties and interest. We continually monitor the ever-evolving tax landscape in the jurisdictions in which we operate and those jurisdictions where our players reside. The requirement to collect sales, value-added, or similar indirect taxes by foreign, state or local governments for sellers that do not have a physical presence in the jurisdiction could also create additional administrative burdens for us, put us at a competitive disadvantage if they do not impose similar obligations on our competitors, or decrease our future sales, which may materially and adversely affect our business, and results of operations.

We may have exposure to greater than anticipated tax liabilities.

Our income tax obligations are based in part on our corporate operating structure and intercompany arrangements. The tax laws applicable to our business, including the laws of the U.S. and other jurisdictions, are subject to interpretation, and certain jurisdictions are aggressively interpreting their laws in new ways in an effort to raise additional tax revenue. Our existing corporate structure and intercompany arrangements have been implemented in a manner we believe is in compliance with current prevailing tax laws. However, the taxing authorities of the jurisdictions in which we operate may challenge our methodologies for intercompany arrangements, which could impact our worldwide effective tax rate and harm our financial position and results of operations. We are currently under a transfer pricing examination by the Israel Tax Authority for fiscal years 2016 through 2018. While we expect to prevail, it is possible that a negative outcome in this examination would have a material impact on our consolidated results of operations and financial position. In addition, changes to our corporate structure and intercompany agreements, including through acquisitions, could impact our worldwide effective tax rate and harm our financial position and results of operation.

Our ability to utilize our research credit carryforwards and certain other tax attributes may have been limited by “ownership changes” and may be further limited.

Our ability to utilize our research credit carryforwards to offset potential future income taxes that would otherwise be due is dependent upon our generation of future income taxes before the expiration dates of the research credit carryforwards, and we cannot predict with certainty when, or whether, we will generate sufficient income taxes to use all of our research credit carryforwards.

Under Section 383 of the Internal Revenue Code of 1986, as amended, and corresponding provisions of state law, if a corporation undergoes an “ownership change” (generally defined as a greater than 50 percentage point change (by value) in its equity ownership over a rolling three-year period), the corporation’s ability to use its research credit carryforwards and other pre-change tax attributes to offset its post-change income taxes may be limited. We may have experienced, and we may in the future experience, ownership changes, either as a result of the Business Combination or other changes in our stock ownership (some of which are not in our control). As a result, if we incur income tax liability, our ability to use our pre-change research credit carryforwards to offset U.S. federal income taxes may be subject to limitations under Section 383, which could potentially result in increased future tax liability to us. In addition, at the state level, there may be periods during which the use of research credit carryforwards is suspended or otherwise limited, which could accelerate or permanently increase state taxes owed.

General Risk Factors

Economic downturns and political and market conditions beyond our control could adversely affect our business, financial condition, results of operations, or prospects.

Our financial performance is subject to U.S. economic conditions and their impact on levels of spending by players, our awards partners and our advertisers. Economic recessions have had, and may continue to have, far-reaching adverse consequences across many industries, including the gaming industries, which may adversely affect our business and financial condition. In the past decade, the U.S. economy experienced tepid growth following the financial crisis in 2008 and 2009 and experienced a recession in 2020 due to the impact of the COVID-19 pandemic as well as international trade and monetary policy and other changes. If the U.S. economy experiences another recession or any of the relevant regional or local economies suffers a prolonged downturn, our business, financial condition, results of operations or prospects may be adversely affected.

In addition, changes in general market, economic and political conditions in domestic and foreign economies or financial markets, including fluctuation in stock markets resulting from, among other things, trends in the economy as a whole, inflation, unemployment, consumer debt levels, geopolitical events and other challenges affecting the global economy, including the ongoing COVID-19 pandemic, disruption of supply chains and conflicts between Ukraine and Russia may

adversely affect consumer confidence or cause a reduction to our players' disposable income or our awards partners' budgets resulting in fewer or less desirable rewards to be offered to our players. In addition, inflation's impact on our operating expenses may affect profitability to the extent that additional costs are not recoverable through increased cost of player acquisition for our games. Any one of these changes could materially and adversely affect our business, financial condition, results of operations, or prospects.

Our results of operations may fluctuate due to various factors and, therefore, our periodic operating results will not be guarantees of future performance.

Our financial results and operating metrics have fluctuated in the past and we expect such results to fluctuate in the future. These fluctuations may be due to a variety of factors, some of which are outside of our control and may not fully reflect the underlying performance of our business.

Our financial results and operations in any given period may be influenced by numerous factors, many of which we are unable to predict or are outside of our control. Player engagement with our games may decline or fluctuate as a result of a number of factors, including the popularity of the underlying games, the player's level of satisfaction with our games, our ability to improve and innovate games and to attract new awards partners, outages and disruptions of online services, the services offered by our competitors, our marketing and advertising efforts or declines in player activity generally as a result of economic downturns, among others. Any decline or fluctuation in the recurring portion of our business may have a negative impact on our business, financial condition, results of operations, or prospects.

Our reported financial results may be affected by changes in accounting principles generally accepted in the U.S.

Generally accepted accounting principles in the U.S., or GAAP, are subject to interpretation by the Financial Accounting Standards Board, or FASB, the SEC and various bodies formed to promulgate and interpret appropriate accounting principles. A change in these principles or interpretations could have a significant effect on our reported financial results, and could affect the reporting of transactions completed before the announcement of a change. Any difficulties in implementing any future changes to accounting principles could cause us to fail to meet our financial reporting obligations, which could result in regulatory discipline and harm investors' confidence in us.

Our core values of focusing on our players and their experience within our games and acting for the long-term may conflict with the short-term expectations of analysts.

We believe that providing quality and highly engaging content to our players is essential to our success and serves the best, long-term interests of our company and our stockholders. Therefore, we have made in the past and we may make in the future, significant investments or changes in strategy that we think will benefit us in the long-term, even if our decision has the potential to negatively impact our operating results in the short term. In addition, our decisions may not result in the long-term benefits that we expect, in which case the success of our games, business, financial condition or results of operations could be harmed.

Securities analysts may not publish favorable research or reports about our business or may publish no information at all, which could cause our stock price or trading volume to decline.

Our stock price and trading volume may be heavily influenced by the way analysts and investors interpret our financial information and other disclosures. If securities or industry analysts do not publish research or reports about our business, delay publishing reports about our business, or publish negative reports about our business, regardless of accuracy, the trading price of shares of our Class A common stock could decline.

If a trading market for shares of our Class A common stock develops, the trading market will be influenced to some extent by the research and reports that industry or financial analysts publish about us and our business. We do not control these analysts. As a newly public company, we may be slow to attract research coverage and the analysts who publish information about us will have had relatively little experience with us, which could affect their ability to accurately forecast our results and could make it more likely that we fail to meet their estimates. In the event we obtain securities or industry analyst coverage, if any of the analysts who cover us provide inaccurate or unfavorable research or issue an adverse opinion regarding our stock price, the trading price of our Class A common stock could decline. If one or more of these analysts cease coverage of us or fail to publish reports covering us regularly, we could lose visibility in the market, which in turn could cause our stock price or trading volume to decline.

Even if we are actively covered by analysts, we do not have any control over the analysts or the measures that analysts or investors may rely upon to forecast our future results. Overreliance by analysts or investors on any particular metric to forecast our future results may lead to forecasts that differ significantly from our own.

We may require additional capital to support our growth plans, and such capital may not be available on terms acceptable to us, if at all. This could hamper our growth and adversely affect our business.

We intend to continue to make significant investments to support our business growth and may require additional funds to respond to business challenges, including the need to develop new games and features or enhance our existing games, improve our operating infrastructure or acquire complementary businesses, personnel, and technologies. Accordingly, we may need to engage in equity or debt financings to secure additional funds. If we raise additional funds through future issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our Class A common stock. In June 2021, we entered into the Credit Agreement, which subjects us to certain operational and financial covenants.

Any additional debt financing that we secure in the future could involve offering additional security interests and undertaking restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. Additionally, the COVID-19 pandemic, including variants thereof, has disrupted capital markets, and if we seek to access additional capital or increase our borrowing, there can be no assurance that debt or equity financing may be available to us on favorable terms, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly impaired, and our business, financial condition or results of operations may be harmed.

Our investment portfolio may become impaired by deterioration of the financial markets.

Our cash equivalent and investment portfolio, including the proceeds of the Business Combination, have been invested with a goal of preserving our access to capital, and generally consists of money market funds, corporate debt securities, U.S. government and government agency debt securities, mutual funds, certificates of deposit, and time deposits. We follow an investment policy and set of guidelines to monitor and help mitigate our exposure to interest rate and credit risk, which guidelines include credit quality standards and permissible allocations of certain sectors to limit our exposure to specific investment types. Volatility in the global financial markets can negatively impact the value of our investments, and recent depressed performance in U.S. and global financial markets due to the COVID-19 pandemic and variants thereof has negatively impacted the carrying value of our investment portfolio. If financial markets experience further volatility, including due to depressed economic production and performance across the U.S. and global economies due to impacts of the COVID-19 pandemic and variants thereof, investments in some financial instruments may pose risks arising from market liquidity and credit concerns. In addition, any disruption of the capital markets could cause our other income and expenses to vary from expectations. Although we intend to manage our investment portfolio for a low risk of material impairment, we cannot predict future market conditions, market liquidity or credit availability, and can provide no assurance that our investment portfolio will remain materially unimpaired.

Our management has limited experience in operating a public company. The requirements of being a public company may strain our resources and divert management's attention, and the increases in legal, accounting and compliance expenses may be greater than we anticipate.

We are a public company, and as such (and particularly after we are no longer an "emerging growth company"), will incur significant legal, accounting and other expenses that we did not incur as a private company. We are subject to the reporting requirements of the Exchange Act, and are required to comply with the applicable requirements of the U.S. Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, and the Dodd-Frank Wall Street Reform and Consumer Protection Act, as well as the rules and regulations subsequently implemented by the SEC and the listing standards of the Nasdaq, including changes in corporate governance practices and the establishment and maintenance of effective disclosure and financial controls. Compliance with these rules and regulations can be burdensome. Our management and other personnel need to devote a substantial amount of time to these compliance initiatives. Moreover, these rules and regulations have increased, and will continue to increase, our historical legal and financial compliance costs and will make some activities more time-consuming and costly. For example, we expect that these rules and regulations may make it more difficult and more expensive for us to attract and retain qualified members to the Board of Directors as compared to a private company. In particular, we expect to incur significant expenses and devote substantial management effort toward ensuring compliance with the requirements of Section 404 of the Sarbanes-Oxley Act, which will increase when we are no longer an "emerging growth company." We will need to hire additional accounting and financial staff, and engage outside consultants, all with

appropriate public company experience and technical accounting knowledge and maintain an internal audit function, which will increase our operating expenses. Moreover, we could incur additional compensation costs in the event that we decide to pay cash compensation closer to that of other publicly listed companies, which would increase our general and administrative expenses and could materially and adversely affect our profitability. We are evaluating these rules and regulations, and cannot predict or estimate the amount of additional costs we may incur or the timing of such costs.

Our executive officers have limited experience in the management of a publicly traded company. Their limited experience in dealing with the increasingly complex laws pertaining to public companies could be a significant disadvantage in that it is likely that an increasing amount of their time may be devoted to these activities, which will result in less time being devoted to the management and growth of our company. We may not have adequate personnel with the appropriate level of knowledge, experience and training in the accounting policies, practices or internal control over financial reporting required of public companies. Our management will need to continually assess our staffing and training procedures to improve our internal control over financial reporting. Further, the development, implementation, documentation and assessment of appropriate processes, in addition to the need to remediate any potential deficiencies, will require substantial time and attention from management. The development and implementation of the standards and controls necessary for us to achieve the level of accounting standards required of a public company may require costs greater than expected. It is possible that we will be required to expand our employee base and hire additional employees to continue to support our operations as a public company which will increase our operating costs in future periods.

As a private company, we were not required to document and test our internal controls over financial reporting, our management was not required to certify the effectiveness of our internal controls and our auditors were not required to opine on the effectiveness of our internal controls over financial reporting. Failure to maintain adequate financial, information technology and management processes and controls could result in material weaknesses which could lead to errors in our financial reporting, which could adversely affect our business.

We were not required to document and test our internal controls over financial reporting, our management was not required to certify the effectiveness of our internal controls and our auditors were not required to opine on the effectiveness of our internal controls over financial reporting. We are not currently subject to Section 404 of the Sarbanes-Oxley Act. However, we are required to provide management's attestation on internal controls commencing with our annual report for the year ending December 31, 2022. In addition, we may lose our emerging growth company status and become subject to the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act. We may not be able to complete our evaluation, testing and any required remediation in a timely fashion. In addition, our current controls and any new controls that we develop may become inadequate because of poor design and changes in our business, including increased complexity resulting from our international operations and our contemplated international expansion. Any failure to implement and maintain effective internal controls over financial reporting could adversely affect the results of assessments by our independent registered public accounting firm and its attestation reports.

If we are unable to certify the effectiveness of our internal controls, or if our internal controls have a material weakness, we may not detect errors timely, our financial statements could be misstated, we could be subject to regulatory scrutiny and a loss of confidence by stakeholders, which could harm our business and adversely affect the trading price of our Class A common stock.

We are currently an "emerging growth company" within the meaning of the Securities Act, and have taken advantage of certain exemptions from disclosure requirements available to emerging growth companies, which could make our securities less attractive to investors and may make it more difficult to compare our performance to the performance of other public companies.

We are currently an "emerging growth company" as defined in Section 2(a)(19) of the Securities Act, as modified by the JOBS Act. As such, we are eligible for and have taken advantage of certain exemptions from various reporting requirements applicable to other public companies that are not emerging growth companies, and we intend to continue to take advantage of such exemptions for as long as we continue to be an emerging growth company, including, but not limited to: (i) not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, (ii) reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements and (iii) exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. As a result, our stockholders may not have access to certain information they may deem important. We will remain an emerging growth company until the earliest of (1) the last day of the fiscal year in which the market value of our Class A common stock that are held by non-affiliates exceeds \$700 million as of June 30 of that fiscal year, (2) the last day of the fiscal year in which we have total annual gross revenue of \$1.07 billion or more during such fiscal year (as indexed for inflation), (3) the date on which we have issued more than \$1 billion in non-convertible debt

in the prior three-year period or (4) the last day of the fiscal year following the fifth anniversary of the date of the first sale of Acies Class A ordinary shares. Investors may find our securities less attractive because we have relied on these exemptions. If some investors find our securities less attractive as a result of our reliance on these exemptions, the trading prices of our securities may be lower than they otherwise would be, there may be a less active trading market for our securities and the trading prices of our securities may be more volatile.

Further, Section 102(b)(1) of the JOBS Act exempts emerging growth companies from being required to comply with new or revised financial accounting standards until private companies (that is, those that have not had a Securities Act registration statement declared effective or do not have a class of securities registered under the Exchange Act) are required to comply with the new or revised financial accounting standards. The JOBS Act provides that a company can elect to opt out of the extended transition period and comply with the requirements that apply to non-emerging growth companies but any such election to opt out is irrevocable. We have elected not to opt out of such extended transition period which means that when a standard is issued or revised and it has different application dates for public or private companies, we, as an emerging growth company, can adopt the new or revised standard at the time private companies adopt the new or revised standard. This may make comparison of our financial statements with another public company which is neither an emerging growth company nor an emerging growth company which has opted out of using the extended transition period difficult or impossible because of the potential differences in accounting standards used.

Our workforce and operations have grown substantially since our inception and we expect that they will continue to do so. If we are unable to effectively manage that growth, our financial performance and future prospects will be adversely affected.

Since our inception, we have experienced growth in the U.S. and internationally. This expansion increases the complexity of our business and has placed, and will continue to place, significant strain on our management, personnel, operations, systems, technical performance, financial resources, and internal financial control and reporting functions. We may not be able to manage our growth effectively, which could damage our reputation and negatively affect our operating results.

Properly managing our growth will require us to continue to hire, train, and manage qualified employees and staff, including engineers, operations personnel, financial and accounting staff, and sales and marketing staff, and to improve and maintain our technology. If our new hires perform poorly, if we are unsuccessful in hiring, training, managing, and integrating these new employees and staff, or if we are not successful in retaining our existing employees and staff, our business may be harmed. Moreover, in order to optimize our organizational structure, we have implemented reductions in force and may in the future implement other reductions in force. Any reduction in force may yield unintended consequences and costs, such as attrition beyond the intended reduction in force, the distraction of employees, reduced employee morale and could adversely affect our reputation as an employer, which could make it more difficult for us to hire new employees in the future and increase the risk that we may not achieve the anticipated benefits from the reduction in force. Properly managing our growth will require us to establish consistent policies across regions and functions, and a failure to do so could likewise harm our business.

Our failure to upgrade our technology or network infrastructure effectively to support our growth could result in unanticipated disruptions. To manage the growth of our operations and personnel and improve the technology that supports our business operations, as well as our financial and management systems, disclosure controls and procedures, and internal controls over financial reporting, we will be required to commit substantial financial, operational and technical resources.

Our current and planned personnel, systems, procedures, and controls may not be adequate to support our future operations. If we are unable to expand our operations and hire additional qualified personnel in an efficient manner, or if our operational technology is insufficient to reliably service our games, we could potentially face difficulties in retaining players, which would adversely affect our business, financial condition, and operating results.

Our organizational structure is complex and will continue to grow as we add additional employees. We will need to scale our operational, financial, and management controls as well as our reporting systems and procedures to support the growth of our organizational structure. We will require capital and management resources to grow and mature in these areas. If we are unable to effectively manage the growth of our business, the quality of our games may suffer, and we may be unable to address competitive challenges, which would adversely affect our business, operations, and financial condition.

Continued growth and success will depend on the performance of our current and future employees, including certain key employees. Recruitment and retention of these individuals is vital to growing our business and meeting our business plans. The loss of any of our key executives or other key employees could harm our business.

Our ability to compete and grow depends in large part on the efforts and talents of our employees and executives. Our success depends in a large part upon the continued service of our senior management team, including Andrew Pascal, our Co-Founder and Chief Executive Officer. Mr. Pascal is critical to our vision, strategic direction, culture, products and technology, and the continued retention of our entire senior management team is important to the success of our operating plan. We do not have employment agreements or offer letters with certain members of our senior management team, and we do not maintain key-man insurance for members of our senior management team. The loss of any member of our senior management team could cause disruption and harm our business, financial condition, results of operations, or reputation.

In addition, our ability to execute our strategy depends on our continued ability to identify, hire, develop, motivate, and retain highly skilled employees, particularly in the competitive fields of game design, product management, engineering, and data science. These employees are in high demand, and we devote significant resources to identifying, recruiting, hiring, training, and successfully integrating and retaining them. Interviewing, hiring, and integrating new employees has and will continue to be particularly challenging during the COVID-19 pandemic. In addition, we have recently observed labor shortages, increasing competition for talent, and increasing employee attrition. As part of our global remote working plans, throughout the duration of the COVID-19 pandemic, we have devoted and will continue to devote increased efforts to maintaining our collaborative culture of the corporate headquarters and each of our domestic and international game studios through the use of videoconferencing and other online communication and sharing tools, and to monitoring the health, safety, morale, and productivity of our employees, including new employees, as we evaluate the impacts of this challenging situation on our business and employees.

We believe that two critical components of our success and our ability to retain our best people are our culture and our competitive compensation practices. As we continue to operate as a public company, we may find it difficult to maintain our entrepreneurial, execution-focused culture. In addition, any volatility in our operating results and the trading price of shares of our Class A common stock may cause our employee base to be more vulnerable to be targeted for recruitment by competitors. While we believe we compete favorably, competition for highly skilled employees is intense. If we are unable to identify, hire, and retain our senior management team and our key employees, our business, financial condition or results of operations could be harmed. Moreover, if our team fails to work together effectively to execute our plans and strategies on a timely basis, our business, financial condition, or results of operations could be harmed.

Any restructuring actions and cost reduction initiatives that we undertake may not deliver the expected results and these actions may adversely affect our business.

We have implemented restructurings in the past and may implement restructurings in the future for purpose of reducing costs, streamlining operations, and improving cost efficiencies to better align our operating expenses with our revenue. Such restructurings may include reducing our headcount, rationalizing our product pipeline, reducing marketing and technology expenditures, and downsizing certain game studios. We plan to continue to manage costs to better and more efficiently manage our business. Our restructuring plans and other such efforts could result in disruptions to our operations and adversely affect our business, financial condition, or results of operations.

We actively monitor our costs, however, if we do not fully realize or maintain the anticipated benefits of any restructuring actions and cost reduction initiatives, our business, financial condition, or results of operations could be adversely affected, and additional restructuring initiatives may be necessary. In addition, we cannot be sure that the cost reduction initiatives will be as successful in reducing our overall expenses as expected or that additional costs will not offset any such reductions. If our operating costs are higher than we expect or if we do not maintain adequate control of our costs and expenses, our operating results will suffer. In addition, any cost reduction measures could negatively impact our business, financial condition, or results of operations including but not limited to, delaying the introduction of new games, features, or content, delaying introduction of new technology, impacting our ability to react nimbly to game or technology issues, or impacting employee retention and morale.

We have a game studio located in Burlingame, California, just south of San Francisco. The occurrence of an earthquake or other natural disaster or other significant business interruption at or near our game studio in Burlingame, California,

or any of our other game studios or facilities, could cause damage to our facilities and equipment and interfere with our operations.

We rent a facility housing a game studio located in the San Francisco Bay Area, an area known for earthquakes, and is thus vulnerable to damage. All of our other game studios and facilities are vulnerable to damage from natural or man-made disasters, including power loss, fire, explosions, floods, communications failures, terrorist attacks, contagious disease outbreak (such as the COVID-19 pandemic), and similar events. If any disaster were to occur, our ability to operate our business at our game studios or facilities could be impaired and we could incur significant losses, recovery from which may require substantial time and expense.

Our insurance may not provide adequate levels of coverage against claims.

We believe that we maintain insurance customary for businesses of our size and type. However, there are types of losses we may incur that cannot be insured against or that we believe are not economically reasonable to insure. Moreover, any loss incurred could exceed policy limits and policy payments made to us may not be made on a timely basis. Such losses could adversely affect our business prospects, results of operations, cash flows, and financial condition.

Because we are a “controlled company” within the meaning of the Nasdaq rules, our stockholders may not have certain corporate governance protections that are available to stockholders of companies that are not controlled companies.

So long as more than 50% of the voting power for the election of directors is held by an individual, a group or another company, we will qualify as a “controlled company” within the meaning of the Nasdaq corporate governance standards. As of March 31, 2022, the Founder Group controlled approximately 74.7% of the combined voting power of our outstanding capital stock. As a result, we are a “controlled company” within the meaning of the Nasdaq corporate governance standards and are not subject to the requirements that would otherwise require us to have: (i) a majority of independent directors; (ii) a nominating committee comprised solely of independent directors; (iii) compensation of our executive officers determined by a majority of the independent directors or a compensation committee comprised solely of independent directors; and (iv) director nominees selected, or recommended for the Board of Directors selection, either by a majority of the independent directors or a nominating committee comprised solely of independent directors. As of the date of this Quarterly Report on Form 10-Q, we do not utilize any of these exemptions, however, should we later choose to do so, you may not have the same protections afforded to stockholders of companies that are subject to all of these corporate governance requirements.

The Founder Group may have its interest in us diluted due to future equity issuances or its own actions in selling shares of our Class B common stock, in each case, which could result in a loss of the “controlled company” exemption under the Nasdaq listing rules. We would then be required to comply with those provisions of the Nasdaq listing requirements.

The dual class structure of our common stock has the effect of concentrating voting power with Andrew Pascal, our Chairman and Chief Executive Officer, which limits an investor’s ability to influence the outcome of important transactions, including a change in control.

Shares of our Class B common stock are entitled to twenty (20) votes per share, while shares of our Class A common stock are entitled to one (1) vote per share. Mr. Pascal and his affiliated entities included in the Founder Group hold all of the issued and outstanding shares of our Class B common stock. Accordingly, as of March 31, 2022, the Founder Group, including Mr. Pascal, beneficially owned approximately 9.8% of the outstanding shares of our common stock and approximately 74.7% of the combined voting power of our outstanding shares of our common stock, and accordingly is able to control matters submitted to our stockholders for approval, including the election of directors, amendments to our organizational documents and any merger, consolidation, sales of all or substantially all of our assets or other major corporate transactions. Mr. Pascal may have interests that differ from yours and may vote in a way with which you disagree and which may be adverse to your interests. This concentrated control may have the effect of delaying, preventing, or deterring a change in control of our company, could deprive our stockholders of an opportunity to receive a premium for their capital stock as part of a sale of our company, and may ultimately affect the market price of shares of our Class A common stock.

We cannot predict the impact our dual class structure may have on the stock price of our Class A common stock.

We cannot predict whether our dual class structure will result in a lower or more volatile market price of our Class A common stock or in adverse publicity or other adverse consequences. For example, certain index providers have announced restrictions on including companies with multiple-class share structures in certain of their indexes. Under these policies, our dual class capital structure would make us ineligible for inclusion in certain indices, and as a result, mutual funds, exchange-traded funds and other investment vehicles that attempt to passively track those indices will not be investing in our stock. It is unclear what effect, if any, these policies will have on the valuations of publicly traded companies excluded from such

indices, but it is possible that they may depress valuations, as compared to similar companies that are included. As a result, the market price of shares of our Class A common stock could be adversely affected.

We may issue additional common stock or preferred stock, including under the 2021 Plan and 2021 ESPP. Any such issuances would dilute the interest of our stockholders and likely present other risks.

We may issue a substantial number of additional shares of common or preferred stock, including under the 2021 Plan and 2021 ESPP. Any such issuances of additional shares of common or preferred stock:

- may significantly dilute the equity interests of our stockholders;
- may subordinate the rights of holders of common stock if preferred stock is issued with rights senior to those afforded our common stock;
- could cause a change in control if a substantial number of shares of our common stock are issued, which may affect, among other things, our ability to use our net operating loss carry forwards, if any, and could result in the resignation or removal of our present officers and directors; and
- may adversely affect prevailing market prices for our Class A common stock.

The historical financial results of Old PLAYSTUDIOS included elsewhere in this Quarterly Report on Form 10-Q may not be fully comparable to our future results as a result of the Business Combination.

The historical financial results of Old PLAYSTUDIOS included in this Quarterly Report on Form 10-Q do not necessarily reflect the financial condition, results of operations or cash flows we would have achieved as a standalone company during the periods presented or those we will achieve in the future. This is primarily the result of the following factors: (i) we will incur additional ongoing costs as a result of the Business Combination, including costs related to public company reporting, investor relations and compliance with the Sarbanes-Oxley Act; and (ii) our capital structure will be different from that reflected in Old PLAYSTUDIOS' historical financial statements. Our financial condition and future results of operations could be materially different from amounts reflected in Old PLAYSTUDIOS' historical financial statements included elsewhere in this Quarterly Report on Form 10-Q, so it may be difficult for investors to compare our future results to historical results or to evaluate its relative performance or trends in our business.

Legal proceedings in connection with the Business Combination, the outcomes of which are uncertain, could divert management's attention and adversely affect our daily operations.

On March 2, 2021, a lawsuit was filed in the Superior Court of California, Los Angeles County, by a purported Acies shareholder in connection with the Business Combination: *McCart v. Acies Acquisition Corp., et al.* (Sup. Ct. L.A. County) (the "McCart Complaint"). The McCart Complaint names Acies and members of Acies' board of directors as defendants. The McCart Complaint alleges breaches of fiduciary duties against members of Acies' board of directors and aiding and abetting the board of directors' alleged breaches of fiduciary duties against Acies. The McCart Complaint also alleges that the registration statement is materially deficient and omits and/or misrepresents material information including, among other things, certain financial information, certain details regarding Acies' financial advisors, and other information relating to the background of the Business Combination. The McCart Complaint generally seeks to enjoin the Business Combination or in the event that it is consummated, recover damages.

Another purported Acies shareholder sent a demand letter on February 19, 2021 (the "Demand"), making similar allegations as those made in the Complaint and demanding additional disclosure regarding the Business Combination.

On April 6, 2022, a class action lawsuit was filed in the United States District Court, Northern District of California, by a purported Company shareholder in connection with alleged federal securities violations: *Christian A. Felipe et. al. v. PLAYSTUDIOS, Inc.* (the "Felipe Complaint"). The Felipe Complaint names the Company and Andrew Pascal, the Company's Chairman and CEO as defendants. The Felipe Complaint alleges misrepresentations and omissions regarding the state of the Company's development of the Kingdom Boss game and its financial projections and future prospects in the S-4 Registration Statement filed by Acies that was declared effective on May 25, 2021, the Proxy Statement filed by Acies on May 25, 2021, and other public statements that touted Old PLAYSTUDIOS' financial performance and operations, including statements made on earnings calls and the Amended S-1 Registration Statement filed by the Company that was declared effective on July 30, 2021. The Felipe Complaint alleges that the misrepresentations and omissions resulted in stock price drops of 13% on August 12, 2021, and 5% on February 25, 2022, following (i) the Company's release of financial results for the second quarter of 2021, ended on June 30, 2021, and (ii) the filing of the Company's annual report for 2021 and issuance

of a press release summarizing financial results for the fourth quarter and year ended December 31, 2021, respectively. The Felipe Complaint seeks an award of damages for an unspecified amount.

While the McCart Complaint was voluntarily dismissed by the plaintiff on August 6, 2021, and we have not received any further communications relating to the Demand, additional lawsuits may be filed against Acies, Old PLAYSTUDIOS or us or our directors and officers in connection with the Business Combination.

Defending the Felipe Complaint and any such additional lawsuits could require any of the above entities to incur significant costs and draw the attention of the management team away from the daily operations of our business. Further, the defense or settlement of any lawsuit or claim may also adversely affect our business, financial condition, results of operations, and cash flows.

Warrants may be exercised for our Class A common stock and Earnout Shares and Sponsor Shares may become issuable or vest, each of which would increase the number of shares eligible for future resale in the public market and result in dilution to our stockholders.

Outstanding Warrants to purchase an aggregate of 10,996,631 shares of our Class A common stock became exercisable in accordance with the terms of the Warrant Agreement governing those securities on October 27, 2021. The exercise price of these Warrants is \$11.50 per share. While the Company has offered to purchase each of its Warrants in the Tender Offer, the Company does not expect that all of the Warrants will be tendered for purchase in the Tender Offer. In addition, up to 15,000,000 Earnout Shares of our common stock may be issued and up to 900,000 Sponsor Shares may vest and become unrestricted upon the closing price of the Class A common stock exceeding \$12.50 and \$15.00 per share, respectively, for any 20 trading days within any 30-trading day window commencing on or after November 18, 2021 and ending no later than June 21, 2026 (the Earnout Shares will also vest based on the price targets in connection with a sale of our company). To the extent the Warrants, which are not tendered for purchase in the Tender Offer, are exercised and such shares are issued or become unrestricted, additional shares of our Class A common stock will be issued or become eligible for resale, which will result in dilution to the holders of our common stock and increase the number of shares eligible for resale in the public market. Sales of substantial numbers of such shares in the public market or the fact that such Warrants may be exercised could adversely affect the market price of our Class A common stock.

Regulatory and licensing requirements may limit the ability of third parties seeking to make investments in us or acquire us.

Many states require prior approval of acquisitions of “control,” as defined under each state’s laws and regulations, which may apply to an investment without regard to the intent of the investor. In some states, the obligation to obtain approval is imposed on the licensee, and in other states, the prospective investor bears the statutory obligation. Depending on the form of entity, the threshold trigger may be limited to voting stock. A failure to make the relevant filings and receive the requisite approvals could result in administrative sanctions against the prospective investor or the licensee, including the potential suspension of the license in that state until the requisite approval is obtained. These regulatory requirements may discourage potential acquisition proposals or investments that would result in a change of control of us, may delay or prevent acquisition of shares that would result in a change in control of us, and, as a result, may adversely impact demand for, and the trading price of, our Class A common stock.

Our warrants are accounted for as liabilities and changes in the value of our warrants could have a material effect on our financial results.

On April 12, 2021, the SEC Staff expressed its view that certain terms and conditions common to SPAC warrants may require the warrants to be classified as liabilities instead of equity on our balance sheet (the “SEC Staff Statement”). As a result of the SEC Staff Statement, we reevaluated the accounting treatment of the Warrants, and determined to classify the Warrants as derivative liabilities measured at fair value, with changes in fair value reported in our statement of operations for each reporting period.

As a result, included on our balance sheet as of March 31, 2022 contained elsewhere in this Quarterly Report on Form 10-Q are derivative liabilities related to embedded features contained within the Warrants. ASC 815-40 provides for the remeasurement of the fair value of such derivatives at each balance sheet date, with a resulting non-cash gain or loss related to the change in the fair value being recognized in earnings in the statement of operations. As a result of the recurring fair value measurement, our financial statements and results of operations may fluctuate quarterly based on factors which are outside of our control. Due to the recurring fair value measurement, we expect that we will recognize non-cash gains or losses on the Warrants each reporting period during which any Warrants remain outstanding and that the amount of such gains or losses could be material.

Additional Risks Related to Ownership of Our Common Stock and Our Operation as a Public Company

The price of our Class A common stock and Warrants may be volatile.

The price of our Class A common stock, as well as our Warrants, may fluctuate due to a variety of factors, including:

- changes in the industries in which we and our vendors operate;
- developments involving our competitors;
- changes in laws and regulations affecting our business;
- variations in our operating performance and the performance of our competitors in general;
- actual or anticipated fluctuations in our quarterly or annual operating results;
- publication of research reports by securities analysts about us or our competitors or our industry;
- the public's reaction to our press releases, our other public announcements and our filings with the SEC;
- actions by stockholders, including the sale by the PIPE Investors (as defined in Note 3—*Business Combination*) of any of their shares of our Class A common stock;
- the issuance and potential sales of 15,000,000 Earnout Shares and potential sale of 900,000 Sponsor Shares upon the occurrence of Earnout Triggering Events;
- the sales of shares of our Class A common stock after the expiration of applicable lockup restrictions;
- additions and departures of key personnel;
- commencement of, or involvement in, litigation against us;
- changes in our capital structure, such as future issuances of securities or the incurrence of additional debt;
- the volume of shares of our Class A common stock available for public sale; and
- general economic and political conditions, such as the effects of the COVID-19 outbreak, recessions, interest rates, local and national elections, fuel prices, international currency fluctuations, corruption, political instability, and acts of war or terrorism.

These market and industry factors may materially reduce the market price of our Class A common stock and Warrants regardless of our operating performance.

In addition, fluctuations in the price of our securities could contribute to the loss of all or part of your investment. If an active market for our securities develops and continues, the trading price of our securities could be volatile and subject to wide fluctuations in response to various factors, some of which are beyond our control. Any of the factors listed above could have a material adverse effect on your investment in our securities, and our securities may trade at prices significantly below the price you paid for them. In such circumstances, the trading price of our securities may not recover and may experience a further decline.

We do not intend to pay cash dividends for the foreseeable future.

We currently intend to retain our future earnings, if any, to finance the further development and expansion of our business and do not intend to pay cash dividends in the foreseeable future. Any future determination to pay dividends will be at the discretion of the Board of Directors and will depend on our financial condition, results of operations, capital requirements, restrictions contained in future agreements and financing instruments, business prospects, and such other factors as the Board of Directors deems relevant.

We will have broad discretion over the use of proceeds from the exercise of the Public Warrants and options, and we may invest or spend the proceeds in ways with which investors do not agree and in ways that may not yield a return.

We will have broad discretion over the use of proceeds from the exercises of the Public Warrants and options. Investors may not agree with our decisions, and our use of the proceeds may not yield a return on investment. We intend to use these net proceeds for general corporate purposes, which may include capital expenditures, investments, and working capital. In

addition, from time to time in the past we have considered, and we continue to consider, acquisitions and strategic transactions, and we also may use such proceeds for such purposes. Our use of these proceeds may differ substantially from our current plans. Our failure to apply the proceeds from the exercises of the Public Warrants and options effectively could impair our ability to pursue our growth strategy or could require us to raise additional capital.

We may be subject to securities litigation, which is expensive and could divert management attention.

The market price of our Class A common stock may be volatile and, in the past, companies that have experienced volatility in the market price of their stock have been subject to securities class action litigation. We may be the target of this type of litigation in the future. Securities litigation against us could result in substantial costs and divert management's attention from other business concerns, which could seriously harm our business.

Future resales of common stock may cause the market price of our securities to drop significantly, even if our business is doing well.

Pursuant to the Sponsor Support Agreement and the Bylaws and subject to certain exceptions, the holders of: (i) the shares of our common stock issued as consideration pursuant to the Business Combination; (ii) any Old PLAYSTUDIOS Options; (iii) the shares of our common stock underlying the Old PLAYSTUDIOS Options; (iv) Sponsor Shares or (v) Private Warrants, in each case, are restricted from selling or transferring any of the securities described in clauses (i), (ii), (iii), (iv) or (v) (the "Lock-Up Securities"). Such restrictions began at the Closing and will end on June 21, 2022, except that as of December 20, 2021, an amount of Lock-Up Securities equal to the lesser of (A) 5% of the Lock-Up Securities held by each holder of Lock-Up Securities and (B) 50,000 Lock-Up Securities held by each holder of Lock-Up Securities, was no longer subject to the transfer restrictions.

However, following the expiration of such lock-up, the Sponsor and the Old PLAYSTUDIOS stockholders will not be restricted from selling shares of our Class A common stock held by them, other than by applicable securities laws. Additionally, the PIPE Investors were not restricted from selling any of their shares of our Class A common stock, other than by applicable securities laws. As such, sales of a substantial number of shares of our Class A common stock in the public market could occur at any time. These sales, or the perception in the market that the holders of a large number of shares intend to sell shares, could reduce the market price of our Class A common stock. As of March 31, 2022, the Sponsor and the Old PLAYSTUDIOS stockholders collectively owned approximately 63.2% of the outstanding shares of our common stock (not including the shares of our Class A common stock issued in the PIPE Financing).

The shares held by the Sponsor and the Old PLAYSTUDIOS stockholders may be sold after the expiration of the applicable lock-up period. As restrictions on resale end and registration statements (filed after the Closing to provide for the resale of such shares from time to time) are available for use, the sale or possibility of sale of these shares could have the effect of increasing the volatility in the share price of our Class A common stock or the market price of our Class A common stock could decline if the holders of currently restricted shares sell them or are perceived by the market as intending to sell them.

The Public Warrants may never be in the money, and they may expire worthless and the terms of the Public Warrants may be amended in a manner adverse to a holder if holders of at least 65% of the then outstanding Public Warrants approve of such amendment.

The Public Warrants were issued in registered form under a Warrant Agreement between Continental Stock Transfer & Trust Company, as warrant agent, and Acies. The Warrant Agreement provides that the terms of the Public Warrants may be amended without the consent of any holder to cure any ambiguity or correct any defective provision, but requires the approval by the holders of at least 65% of the then outstanding Public Warrants to make any change that adversely affects the interests of the registered holders of Public Warrants. Accordingly, we may amend the terms of the Public Warrants in a manner adverse to a holder if holders of at least 65% of the then outstanding Public Warrants approve of such amendment. Although our ability to amend the terms of the Public Warrants with the consent of at least 65% of the then outstanding Public Warrants is unlimited, examples of such amendments could be amendments to, among other things, increase the exercise price of the Public Warrants, shorten the exercise period or decrease the number of shares of Class A common stock purchasable upon exercise of a Public Warrant.

In connection with the Tender Offer, the holders of the Public Warrants tendering their Public Warrants for purchase by the Company will be consenting to an amendment to the Warrant Agreement which, if approved by the holders of at least 65% of the outstanding Public Warrants, will permit the Company to redeem the Public Warrants for \$0.90 in cash per Public Warrant, which is 10% less than the purchase price for the Tender Offer.

We may redeem the Public Warrants prior to their exercise at a time that is disadvantageous to the holders of Public Warrants.

In addition to the Company's right to redeem the Public Warrants for \$0.90 in cash per Public Warrant if an amendment to the Warrant Agreement is approved by the holders of at least 65% of the outstanding Public Warrants in connection with the Tender Offer, we have the ability to redeem outstanding Public Warrants at any time after they become exercisable and prior to their expiration, at a price of \$0.01 per Public Warrant if, among other things, the last reported sale price of our Class A common stock for any 20 trading days within a 30-trading day period ending on the third trading day prior to the date on which we send the notice of redemption to the holders of the Public Warrants equals or exceeds \$18.00 per share (as adjusted for share splits, share dividends, rights issuances, subdivisions, reorganizations, recapitalizations, and the like). If and when the Public Warrants become redeemable by us, we may exercise our redemption right even if we are unable to register or qualify the underlying securities for sale under all applicable state securities laws. As a result, we may redeem the Public Warrants as set forth above even if the holders are otherwise unable to exercise the Public Warrants. Redemption of the outstanding Public Warrants as described above could force the holders of Public Warrants to: (i) exercise the Public Warrants and pay the exercise price therefor at a time when it may be disadvantageous for them to do so; (ii) sell the Public Warrants at the then-current market price when they might otherwise wish to hold their warrants; or (iii) accept the nominal redemption price which, at the time the outstanding Public Warrants are called for redemption, we expect would be substantially less than the market value of the Public Warrants. None of the Private Warrants will be redeemable by us (subject to limited exceptions) so long as they are held by our Sponsor or its permitted transferees.

In addition, we have the ability to redeem the outstanding Public Warrants at any time after they become exercisable and prior to their expiration, at a price of \$0.10 per Public Warrant if, among other things, the last reported sale price of our Class A common stock for any 20 trading days within a 30-trading day period ending on the third trading day prior to the date on which we send the notice of redemption to the holders of the Public Warrants equals or exceeds \$10.00 per share (as adjusted for share splits, share dividends, rights issuances, subdivisions, reorganizations, recapitalizations and the like). In such a case, the holders will be able to exercise their Public Warrants prior to redemption for a number of shares of Class A common stock determined based on the redemption date and the fair market value of our Class A common stock. The value received upon exercise of the Public Warrants (i) may be less than the value the holders would have received if they had exercised their Public Warrants at a later time where the underlying share price is higher and (ii) may not compensate the holders for the value of the Public Warrants, including because the number of shares of our Class A common stock received is capped at 0.361 shares of Class A common stock per Public Warrant (subject to adjustment) irrespective of the remaining life of the Public Warrants.

Furthermore, the shares of Class A common stock issued upon exercise of the Public Warrants or Private Warrants (or upon the redemption of such Public Warrants for shares of our Class A common stock) will result in dilution to the existing holders of our common stock.

Delaware law and our organizational documents contain certain provisions, including anti-takeover provisions, that limit the ability of stockholders to take certain actions and could delay or discourage takeover attempts that stockholders may consider favorable.

Our organizational documents, and the Delaware General Corporation Law ("DGCL"), contain provisions that could have the effect of rendering more difficult, delaying or preventing an acquisition that stockholders may consider favorable, including transactions in which stockholders might otherwise receive a premium for their shares. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock, and therefore depress the trading price of our common stock. These provisions could also make it difficult for stockholders to take certain actions, including electing directors who are not nominated by the current members of the Board of Directors or taking other corporate actions, including effecting changes in our management. Among other things, the organizational documents include provisions regarding:

- the ability of the Board of Directors to issue shares of preferred stock, including "blank check" preferred stock and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquirer;
- the Certificate of Incorporation will prohibit cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;
- the limitation of the liability of, and the indemnification of, our directors and officers;

- the ability of the Board of Directors to amend the Bylaws, which may allow the Board of Directors to take additional actions to prevent an unsolicited takeover and inhibit the ability of an acquirer to amend the Bylaws to facilitate an unsolicited takeover attempt; and
- advance notice procedures with which stockholders must comply to nominate candidates to the Board of Directors or to propose matters to be acted upon at a stockholders' meeting, which could preclude stockholders from bringing matters before annual or special meetings of stockholders and delay changes in the Board of Directors and also may discourage or deter a potential acquirer from conducting a solicitation of proxies to elect the acquirer's own slate of directors or otherwise attempting to obtain control of our company.

These provisions, alone or together, could delay or prevent hostile takeovers and changes in control or changes in the Board of Directors or management.

The provisions of the Certificate of Incorporation requiring exclusive forum in the Court of Chancery of the State of Delaware for certain types of lawsuits may have the effect of discouraging lawsuits against our directors and officers.

Our Certificate of Incorporation provides that, to the fullest extent permitted by law, and unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, in the event the Chancery Court does not have jurisdiction, the federal district court for the District of Delaware or other state courts of the State of Delaware) will be the sole and exclusive forum for: (i) any derivative action, suit or proceeding brought on our behalf; (ii) any action, suit or proceeding asserting a claim of breach of a fiduciary duty owed by any of our directors, officers, or stockholders to us or our stockholders; (iii) any action, suit or proceeding arising pursuant to any provision of the DGCL or our Bylaws or our Certificate of Incorporation (as either may be amended from time to time); (iv) any action, suit or proceeding as to which the DGCL confers jurisdiction on the Court of Chancery of the State of Delaware; or (v) any action, suit or proceeding asserting a claim against us or any of our current or former director, officer, or stockholder governed by the internal affairs doctrine. Notwithstanding the foregoing, our Certificate of Incorporation provides that the exclusive forum provision will not apply to suits brought to enforce a duty or liability created by the Securities Act or the Exchange Act, or any other claim for which the federal courts have exclusive jurisdiction. Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all suits brought to enforce any duty or liability created by the Securities Act or the rules and regulations thereunder. Similarly, Section 27 of the Exchange Act creates exclusive federal jurisdiction over all suits brought to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder. The organizational documents also provide that, unless we consent in writing to the selection of an alternative forum, to the fullest extent permitted by law, the U.S. federal district courts shall be the exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act.

These provisions may have the effect of discouraging lawsuits against our directors and officers. The enforceability of similar choice of forum provisions in other companies' certificates of incorporation has been challenged in legal proceedings, and it is possible that, in connection with any applicable action brought against us, a court could find the choice of forum provisions contained in our Certificate of Incorporation to be inapplicable or unenforceable in such action.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 3. Defaults Upon Senior Securities

None

Item 4. Mine Safety Disclosures

Not applicable

Item 5. Other Information

None

Item 6. Exhibits

The following exhibits are filed as part of, or incorporated by reference into, this Quarterly Report on Form 10-Q.

Exhibit Number	Description
3.1	Certificate of Incorporation of PLAYSTUDIOS, Inc. (incorporated by reference to Exhibit 3.1 to Current Report on Form 8-K filed June 25, 2021).
3.2	Bylaws of PLAYSTUDIOS, Inc., effective as of June 21, 2021 (incorporated by reference to Exhibit 3.2 to Current Report on Form 8-K filed June 25, 2021).
31.1*	Certification of Chief Executive Officer of Periodic Report Pursuant to Rule 13a – 14(a) and Rule 15d – 14(a) under the Securities Exchange Act of 1934, as amended, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2*	Certification of Chief Financial Officer of Periodic Report Pursuant to Rule 13a – 14(a) and Rule 15d – 14(a) under the Securities Exchange Act of 1934, as amended, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1*	Certification of Chief Executive Officer and Chief Financial Officer Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
PLAYSTUDIOS, Inc.

Date: May 5, 2022

By: /s/ Andrew Pascal
Name: Andrew Pascal
Title: Chairman and Chief Executive Officer
(Principal Executive Officer)

Date: May 5, 2022

By: /s/ Scott Peterson
Name: Scott Peterson
Title: Chief Financial Officer
(Principal Financial and Accounting Officer)

Certification of the Chief Executive Officer
Pursuant to Exchange Act Rule 13a-14(a)/15d-14(a)
as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

I, Andrew Pascal, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of PLAYSTUDIOS, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

(Principal Financial and Accounting Officer)

**Certification of CEO and CFO Pursuant to
18 U.S.C. Section 1350, as Adopted Pursuant to
Section 906 of the Sarbanes-Oxley Act of 2002**

In connection with the Quarterly Report on Form 10-Q of PLAYSTUDIOS, Inc. (the "Company") for the quarter ended March 31, 2022 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Andrew Pascal, as Chief Executive Officer of the Company, and Scott Peterson, as Chief Financial Officer of the Company, each hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to the best of their knowledge:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
